Digital illustration of a person wearing a matching rainbow outfit with a red cape that reads, "queer liberation not rainbow capitalism." There are protestors behind them with signs that read, "fight poverty, not the poor," "we deserve access to gender affirming care,"

is that as misleading as rock bands are about actual rock exshoolee rolling?

Augustine, Analogy of Being, Delusion & Fr Romanides Worship in "John the Pilgrim" - Jay Dyer -- 11K views --- Jul 23, 2022 --- 555 - Jay Dyer -- 93.4K subscribers

Note: I misspoke when holding the book St Basil Against Eunomius: I meant to say Basil Against Eunomius and said "On the Holy Spirit." Today I will be replying to an individual as a test case of mental illness and obsessive subversion which will function as a case study - not only in mental illness and prelest, but also in some of the real issues in the Orthodox world. For years various individuals, when opposed or refuted, become obsessive and as always happens, eventually out themselves as adopting bizarre heresies or having unorthodox pet beliefs all along. Often this has to do with not having actually done the reading or had any philosophical training, thinking they can bypass that with their nauseating piety signaling and spiritual one-upping. Today one of these subversives has been outed and will be a case example in delusion, heresy and mental illness as we cover the real issue in Fr Romanides' actual mistakes and what the fruits are with one of his obsessive, clearly mentally unstable disciples. It will also help clarify the issues are not a choice between Augustine or Fr Romanides but that both are in error.

i see you tryin to take [back?] markcyst tactics for a righteously realistic solid cause ['backage?'] when comparing the theowoo you leave out of your sessions w Tim Kelly. Takes a split person to debate one i guess. I use colours and hammer on piety too but my engagement has dwindled to just pointing out/to my

notes, beggin people to chuck them into their searchpool to see if i won't suprise them down the line ..

ascribing the whole thing to psyops, suppressing the rainbow family aspects completely. am i rite?

with all we know about western efforts to appease and bribe eurasia into allowing everything from precarious footholds to memey thumbscrews and the panoply of torturous instrumentaria on and in it's periphery known as europe, how suprising can the escalations in Ukraine be anymore .. knowing that khazarians have taken their detour to the US via every empirizable square mile in all directions, taking a few thousand years for imperceptibility sake, the name stealers are also the shadow people .. and shadow such an antedatable prime candidate for wokey wordijizum antedotery.

i identify as confrontation aversive ... best and only then safe to be and safely done with and among purely innocuous people as bottom liners .. delightful ones being too rare to come by and waste futile words on, .. which has a concomitant: changes are dogs are trained to be the release valve for evil eyes of overrompelaars who sidle up to you w complete legality but proceed to search out lines to cross as if their life depended on it.

you o so vainly hope unannounced unintroducted new neighbours are not tokkies from hell waaaay below said line ... and you all too readily forget you yourself .. i mean i, quintupled their 'power' underestimating their underlandishness ... a sneaky creep is a 'gluiperd' .. and don't be fooled by homophony with 'luipaard'.

Long story [out soon, a thouPageBook the only perk from being a CA child of destiny and ({{{therefore}}}) special interest] short, it's worse, like i [socratically, ({{{ch}}}imp)practically] pretended some ogre did not spray poison on my 'straatsteenspleetplant' = pdf cardgamefied botany at hortus.nl just as i was about to chomp on some leaves from it [a dandelion 30cm from my doorstep].

Faulty instructions were the reasons Monsanto/Bayer was to coovf up 2bill [later runter gehandjeklapt to 89 million] for a couple of Bay area groundkeepers who eventually got the NHLymphoma it took me only a few leaves to archeaves .. i mean achieve .. but perhaps it was just a veiled reward for being the oldest RoundUp customer .. which i first learned about at a logging protest camp in Victoria 1997.

i ask myself .. how clear can a case be made?? ... a few tests are easy .. i took some telling photos ... never mind the hematologist doesn't cooperate when asked to fork n siphon over some collegual papers despite being his hospital's poster boy .. or, more likely, bycause of it. low, he won't get me the relevant info from colleagues involved in the 10thou fellow NHL victims in the class action suit that led Bayer to pledge 11biljan for settlements.

And yet, if i had the choice of spending say 10thou euro on courtcases for this ... or on a debate between GWebb and RDawson moderated by PD and MaxB .. who just did a balm of a vid w Kim Iversen, frehsly exHill, i'd not hesistate at all.

to show my appreciation for the much more embarrassing confession / 'cred crud' in your last stream i'll give you the short version of my next thousand pages ready to go [covers my last half a decade]:

smile killer markers along the pride/groomer trajectory:

terrain theory crumble and precipitous ['free'?fall off] loss of all thing truly humble ... [macro]think lanky

tall treeculture man vs stocky [gedrongen as the dutch say] fight-suited statures and statuses ...

... zoom back in a bit to:

nuke / ddt [polio?], agent orange, gmo [percy schmeiser] and duh 'frogagayin' waters [JA should win awards for that as much as he deserves criticism for claiming nobody died ...which btw, leaves 'onverlet' that indeed false flaggery had a sharp rise in that era .. people were just not used to them being just exactly as deadly as excercizes gone live just exactly as deliberately].

the 80s began to feed the genderz debates real nitro fuel [which have the weirdest echos to 2 lookalikes btw, shulamith firestone and otto weininger, not to mention the mix of their topics].
Hot Engine Change countering measures anyone?

Take the Garbage docus centering around what happened in canada [FEMINAZIFIED LEGISLATION#]..

The integrated vampire (and what is related to it)

Passagen Verlag, 2017 [dead link]:

<https://www.passagen.at/cms/index.php?id=62&isbn=9783709202579&L=0>

Already with the title GeprÄ½fte Soelen, the author extended the term integration within the framework of the psychoanalytic theory of Melanie Klein to an "inner world" of abandoned object relations. The concept of an integrating mourning is rigorously pursued by Rickels in The Integrated Vampire on DW Winnicott's analysis of asocial tendencies and applied to the socio-historical problem of curbing psychopathic violence.

Rickels interprets the updates of the vampire myth in the 21st century as figures of integration, whose traces he also makes in the science fiction genre of the post-war period: in the future visions of "German science fiction", which he described as encrypted integration history of Germany after the collapse of the Third Reich read. The focus here is on the ability to mourn the upstream phase of integration, which Klein calls reparation. Switching between science-fiction readings and case studies of modern art, the study draws a portrait of the post-war world that ignores neither the destruction nor the unsustainable associations that emerge from the traces of mourning and that must trace redemption.

Dugin rep: 'obscure', 'unstraitforward' ... then what to think of the viable seed perversions by the taint of duh times, sprouted and spread by the ultraliminal likes of me? Wa Tab Out the flaggery faggery and completely out of control legal consequences of genderpushes 'triggered' by my colouring schemes [90s] and frequent mentions of neoteny.org [Andrew Lehman - 10s]? who would have thought it could come to this NFT [destroying Dan Olson] shite from urges to learn from Beckerath [noughties] ... and to make bodsoul spirit hatrex complete i'll throw presently debaclin nitrogen about and wonder if my hammerin out solutions in the 80 [as assured to fire and we can be 'sure' of water in the netherbrands for kkkkrass 'my dorst' slake].

Do i need to make the list longer?

i appreciate McGowan but duh cia has the cushiest job in the world, turning threatening uprisings into festivals and vica versa .. with impunity about the dirty tricks employed .. it's the blueprint for corporatism ... all who verstok [stubbornify] in the face of [not necessarily purely immanent forever of course] poetpietistic proclamation need to be publically tortured by volunteers and smashed to fishfeed. What i mean to say is these people are necessarily broad and deep ... always tying to and prying in ripening of religiosity {which it does in the direction of immunology - that's peter sloterdijk way of hinting at and yet directing away from me - our shared osho karma is the weirdest backto back sensurround i tellya}. But, .. to confuse / equate Clheinigans with rainbowfamily spirit or the likes of me joining a 4th of july drumcircle with cartwheelhoop and local rocks to help drown the din of a heli w curious faces is the stupidit i have seen a host of 'researchers' commit who have an alas all too solid tradition in the States, they are right along those who take satirization of christianity way too seriously. i'll name a few: Jan Irvin, Jay Dyer, Freeman, Outtrim Attwill, etcetera. Better look at ALL effects of tibetan rockwork more closely and try relate compost heaps with pyrimuds aroound the world or sumthin aloha and hasta la vista, good bye.

i still hear little echo from bringing up an essential aspect .. dozens and dozens of times and again by now and that delay spells trouble - sorta hinted at in a comment i tapped up here yesterday:

<https://odysee.com/@ExposeTheEnemy:b/the-antedote-aleksandr-dugin-part-two-%288:1>

Notable [chime in] exception is AlexJJ: 'makes the frogs gay'

the wry tragedy of lefties, supposedly all for eco cleansery, in fact accept and accomodate the 'tox ups' .. more and more inescapable, i'll give them that much realism. This opposite of wokie ideals is a side effect, an unintended fall out, the 'busyembodily' harm which their opposition brings and spreads about industriously and industrially.

Pronoun sensibility missions try occupy outposts and cause outrage. Their [eastward] face and accept

campaigns are in fact expansionary# whip up slip up hysterix overshoot promotes and celebrates the biocidal opposite of claimed intent. This is key to gender changery 'pandemical' waves and drives. I hope you get the allusion to Pandoran Pollution. Arm the enemy to level the p[l]aying field eh?

= So is opposition / reaction to that by consies, also resorting to tools counterproductive to reaching claimed goal [iow, ways annd means work 'averechts' .. averij is shipdamage in dutch btw]. Think of long term effect from heavy metal spraying all over east Ukraine .. that's bound to cause a nitro version of wokist memepower for descendants from a mere couple of generations feeding in that territory .. and they are HUUGE exporters too!

The Gender Oracles and Their Holy Children

The radical gender theorists see a potential holy child in every crib. ----- Barbara Kay

Once they get a strong vibe about a particular child, they present him with possessions from the former Dalai Lama, along with other unrelated objects. If the boy chooses the non-sacred objects to play with, he is ruled out as the former leader's reincarnation. If he chooses the former Dalai Lama's possessions, his world is turned upside down.

"mere coincidence" .. ?? i think not ... there's at least enough double checking goin on to allow for instructions to diverge from routine and/or formallist outcomes ... and certainly enuff space between sessions to establish plausibility on both sides; the institutionalists vs those who'd rather fuck with the program, see them gone or wanna be left alone [which really means something in tibetan remoteness, generalized by life itself, Life OurSelf].

Does that lady, Ehrensaft know that boys were in "dresses" until they were toilet trained in middle class American households a hundred or so years ago? It was the practicality of reducing the diaper laundry loads. Sheesh is right, Colin!

'she' was a man too long for that ... my introduction to crossdressers came from occasional [90s] peeks in at the amsterdam cafe collecting them in various combos ... never felt like goin in .. even tho i'd fit in easily enuff hair short now after chemo, first time in decades. Neither did i volunteer to dress a cross like jesus 'did' .. but i did provoke local witches a tad and a socratic act is easily opted for when feelin truly undefended.

Then again, guys like Ralph Ellis might have point if he claimed, which he doesn't explicitly, jesus didun do nuthin but associate with the self castratin galatians, like with whores, .. but a prominent and revo leader ... pedigrees may stretch rite thru the templars and pedos to the likes of that certainly satanistically named creature. Calling 'that' a lady is a mighty stretch Ute

How DO you organize protests for efficiency anyway??

i know one thing: can't do it won't do it without rocks and ways to spin'm into each other, drill, pierce, mount wings, set up in a breeze ... and don't until you you either water or 'veil' where the rub is. Decency first .. cause old lady votes count as well don't you know.

i won't be happy til Putin kills frackgas corpocracy as conscientiously as he seems to be about gmos, roll up biolabs and soon, hopefully, distance himself from wokie vaxology. i should ask George Webb to wax eloquent about the flavor diffs perhaps.

What Could Go Wrong? A Conversation with Jeffrey Smith on GMO 2.0 --- 667 views - Streamed live on Sep 13, 2022'----- 38 - Organic Consumers Association -- 4.47K subscribers ----- #Monsanto's first genetically modified organism was a synthetic growth hormone engineered to make cows over-produce milk. It went on to stuff the human diet with vegetable oils, sweeteners and grains that had been engineered to absorb herbicides or produce insecticides. ----- Since merging with #Bayer, the company has vowed to go much further, replacing animal

products with lab-grown synthetics and restructuring soil biology with synthetic microbes.

Bayer is taking the GMO technologies developed in agriculture, combining them with advances in big data, artificial intelligence, the internet of things and wearable tech, and applying them to the health care sector, as well as food.

===== Why stop with fake meat when you can use genetically engineered pigs to grow new organs for people who need transplants?

i shared Ry's cozystream yesterday in which he played an RT docu on wheat growing and movement around the world focusing on price ... and the effect of blockading Russia while schizophrenically accusing Russia and offshoring their own blame on the broad shoulders and back[cunttree] it is known as. This is like a game of ballfetch by hellhound who hurls his prize/burden into onto target territory and then goes after it as a retrieval game for which he carries no conquerment blame. Galatian crossdress Templar banker pilgrims use Deelike calculations instead of balls but that's another story ... i'm not getting into kingof.uk waters before unburdening myself of this boatload:

Said docu [Breaking Bread] completely misses and/or avoids .. either way it lacks an explanation for 'reasons' as to why Putin isn't just risking lives over nothing much much more life is at stake ... the "nature of nature" even as Jeffrey puts in towards the end of this video.

He is one hell of a Genetic WarFront Fighter Vet for sure. I saw him in Germany somewhere, probably Witzenhausen, where i went to look for 'traces' and echos of Julius Hensel, in the eighties!! I thought i'd win battles along my chosen trajectory, if i had to fight any at all, easily. Overconfident little brat with fuck off money access and licence that i was. Little did i suspect i was to be ignored [misunderstood, vastly underestimated, etcetera, proolly for most of the next few centuries at least, in fact] and be at the receiving end of the horror tales i didn't take to heart enuff to have them serve me as motivation, proolly afraid they'd backfire and add to the already awesomely impressive burden of discouragement factors; the signs of my anachronism .. due to the fundamentally different breeds that brought my parents about and together.

all of europe could taken curing cues from the explosive being i am, part germanic, part sephardic .. but it was the avuncular dirty trick strain that won out

Ry, for all his self assured but delusional signaling he has this prob down pat and watertite has thus far managed to repress and even fite such clues and i'll be prodding him to look at his own family thru a Kalergi and Fong-Jones type outcome lense a little closer often going forwards, hoping at some point he'll

Sewage Sludge Composting and Pharmaceuticals ----- Egge Haiba, MSc ---- Lembit Nei, PhD ----- Tartu College, Tallinn University of Technology, Estonia

Abstract ----- Drug residues end up in the environment when sewage sludge or its compost is used as a fertilizer and they cause adverse effects there. Both, the producers and consumers seem to believe that drug residues decompose during sewage sludge treatment or in soil and do not affect the environment or humans. The acceptable level of drugs in different compartments of the environment is still disputable. --

--bitchute.com -- Mathematician Thomas Baden-Riess Conspires With Us ---- Live: Mondays/ Thursdays 7pm UK time (Go INTO channel due to YT suppression!) Send a Superchat here: <https://entropystream.live/thejollyheretics> ----- Right, as Prof. Dutton suggested, I went to Reading University Library to see if there were any theses in there that could be the same as the one that Baden-Riess claims he wrote. I live near Reading and did my degree there about ten years ago, so I know the place well. This is what I found out. ----- There were about 150 PhD theses in mathematics written between 2000 and 2020. None of these bore any resemblance to the one Baden-Riess claims to have written there, but under a different name.

I eventually managed to speak with a secretary in the maths department. She said that the University is aware that Baden-Riess is claiming he is a University of Reading alumni, and that they have taken measures to stop him from making this claim. Unfortunately, up till now the University has failed to get websites like Reasearchgate to take down his thesis.----- Apparently Baden-Riess has threatened the University with police action if they take action against him. He has already threatened them with the courts on the grounds that the University is abusing him for being gay, a transwoman and a Jew etc.----- She said his thesis is a cut and paste job based on a thesis in China, so no surprise there. She said you can pay for a thesis for about a grand or so. She also said that researchers in China are also aware Baden-Riess copied their work, but they too cannot do anything.

She said that Baden-Riess did originally attend the university, but only as an undergraduate. He dropped out after only a year. -----She said that he always acted like he was better than everyone else, and went around trying to talk to lecturers and PhD students as if he were one of them, whilst ignoring the first year undergraduates who he took lessons with. Everyone thought he was foolish.

She said he left the university after being arrested by the police for stalking a BBC presenter. ===== She said his real name wasn't Baden-Riess and that he wasn't even called Thomas. She said he was a Mick or a Nick or something, she couldn't quite remember. She also said he is very common. That's all I have but Professor Dutton has been vindicated here. If you saw the stream he simply destroyed Baden-Riess at most points, and no more so when he called him out for his BS about having a PhD. I notice that Baden-Riess used the lure of his PhD to call out Ed in the first place. From this point onwards he can't be allowed to get away with this sort of blackmail when it is now clear that he simply has no PhD in mathematics and that he is a fraud, quack and scammer and about as legitimate as a Nigerian Prince who wants your bank account details.

Al Qaeda is getting blackmarket weapons from Ukraine and popping off in Syria again. Bus loads of NATO backed ISIS terrorist have also arrived in Ukraine which is desperate for manpower. So NATO is now backing both Nazi and Al Qaeda fighters to protect Zionist Oligarchs in Ukraine. As they always do, al Qaeda will play along and then double crossed the US after it has its weapons and money. US doesnt care so long as they don't attack Israel.

PD is mighty Hegelian and daft when he opposes the UN Constitution's defense of indivy to Wilhelm Wundt's totalitarian state. Funny to me cause it seems a polarity forming point with Spinoza's refutation of state and Church, revolutionarily toppling their gender/polarity / top/bottom 'stati' of and at the time.

But if you are willing to learn from me, you'll find out it takes peculiar state to guarantee indiv right alright, .. just nothing the US Const. ever even got close to in purview, by implication, let alone execution [kneejerk and rudimentary aspects excepted, low low tier admin levels of a truly snapshot concept/word such as state run into complexity probs the more it leans upon and into the liminal and boundless aspects of itself / it's self .. progressively divided self - the inter and/or outer splinter probs come down to membrane, dyke, sieve and marriage customs ... nothing to do with indiv'y as such]

24th minute: talks about a guitarist the 25th minute

<https://200yearstogether.blogspot.com/2011/11/chapter-24-breaking-away-from.html>

A transformation in public consciousness often pushes forward outstanding individuals as representatives, symbols and spokesmen of the age. So in the 1960s Alexander Galich became such a typical and accurate representative of the processes and attitudes in the Soviet intellectual circles. ("Galich" is a pen name, explains N. Rubinstein. It is made of syllables of his real name -- Ginsburg Alexander Arkadievich. Choosing a pen name is a serious thing."20 Actually, I assume that the author was aware that, apart from being "just a combination of syllables," "Galich" is also the name of the ancient Russian city from the very heart of Slavic history.) Galich enjoyed the general support of Soviet intelligentsia; tape recordings of his guitar performances were widely disseminated; and they have almost become the symbol of the social revival of the 1960s expressing it powerfully and vehemently. The opinion of the cultural circle was unanimous: "the most popular people's poet," the "bard of modern Russia." Galich was 22 when the Soviet-German War broke out. He says that he was exempt from military service because of poor health; he then moved to Grozny, where he "unexpectedly easily became the head of the literature section of the local Drama Theatre"; he also "organized a theater of political satire"; then he evacuated through Krasnovodsk to Chirchik near Tashkent; in 1942, he moved from there to Moscow with a front-line theatrical company under formation and spent the rest of the war with that company.

Oy Vey! The Jews Are Ye's Misfortune --- David Cole -- October 25, 2022 -- The Jews Are Ye's Misfortune --- Kanye West's Jew-obsessed meltdown offers many potential angles for analysis. ---- I could start with the "why do you still trust Tucker?" angle. Carlson prefaced his now-infamous Kanye interview with an assurance to you, the viewer, that even though Kanye's detractors claim the man's mentally ill, he isn't: "Is he crazy? No, he's not. He's not crazy at all." That's a direct quote. Yet Tuck knew when he uttered those words that he'd had to edit out footage in which Kanye clearly displayed mental instability (ranting about impostor children kidnapping his kids, Louis Vuitton assassinating black people, a divinely inspired plan to build "free kinetic energy cities," and blacks being the real Jews, which is why Margaret Sanger wanted to exterminate them on behalf of the KKK).

Eating your seed corn --- Xymphora, Oct 27 2022

I just wanted to comment briefly on this article, which defies belief: "Slouching Towards Reverse Colonialism" (below â€” RB). This is so completely detached from reality that I don't know where to start. How does the forced moving of German industry to America due to impossible energy costs, constitute â€” eating your seed corn'? European self-caused penury will reduce the European ability to buy American goods, but it is a huge world out there, and the loss of European demand will be quickly soaked up by increasing demand from countries run by serious people, like in Asia. America sells not goods but services, as American billionaires decided to no longer produce goods, as American poors won't work for cheap enough wages. The bonus is the US gets all the best of the highest tech big industry from Germany, something so difficult and valuable, as Cuckland is soon to find out, that it is essentially impossible to replicate unless you can capture the entire German engineering brain trust. I think we should seriously reconsider whether the Americans were stupid in blackmailing the Euro-trash to self-sanction Europe to death by attempting to sanction Russia. They had to know it probably wouldn't work. They also know the European price caps won't work, but we should be thinking of an ulterior motive, at least the further deindustrialization of Europe.

There is a huge downside in increased American inflation, but that will pass, and the bonus advantage is that the Democrats get to own it, and will thus soon be replaced by the (slightly) preferred Republicans. It is all good, as far as American billionaires are concerned. In addition, maybe the Russians might have flubbed the response and actually would have been destroyed by the sanctions, at no long-term cost to the US. With almost all the down side falling on the Europeans, why not try it? We have to consider the fact that the Americans intended for the sanctions to backfire on Europe. To put it another way, it is win-win planning: if the sanctions work, American capital gets Russia; if they fail, American capital gets Europe. Who wouldn't place that bet? How does replacing cheap pipeline gas from Russia with shipped fracked LNG from America, at up to ten times the price (!), hurt the US? It is an amazing gravy train, so lucrative as to be without precedent. Of course, this will also end, as impoverished deindustrialized Europeans won't be able to continue to afford it, but fracked gas is also running out, with the last of it now sold at prices no American energy company could dream of in normal situations.

How does forcing the Euro-trash to dewater themselves so they will have to resupply from American weapons manufacturers damage the US? A lot of this stuff was of Soviet design, cutting the US out of the market. Now they get to start on a clean slate, able to bank billions from new European weapons purchases of American arms that would not otherwise have occurred (and once in the Americans arms ecosystem, linked together with American software, they will be stuck buying American parts and new American systems forever). The bonus is that the anachronism of NATO, a big weapon of American control of Europe which had no obvious purpose, and increasingly an American and Israeli proxy army for adventures elsewhere, gets to survive and prosper. On top of all of that, fears of WW3 are now leading to even greater European purchases of arms, which again would never have occurred without poking the Bear and trying to provoke nuclear WW3. The Euro-trash will continue to buy arms even as their people starve and freeze. Finally, let us not forget the Hail Mary goal of the (((neocons))), to recreate those lovely Yeltsin years, and break Russia into small impotent pieces of no threat to the US. Each piece will then be systematically raped by American capital for the massive amounts of raw materials in Russia.

This is a long shot but Russia has been set in play, with the possibility of regime change, at relatively no cost to US billionaires. Sure, billions have to be printed, but most of that benefits the billionaires in the US, and never makes it to Ukraine. The US has achieved all these big advantages, at almost no cost to itself, as the Euro serfs are paying for it. Prabhat Patnaik, a real economist who understands the world, nailed it: the Euro-trash have allowed America to impose and collect a tax on the working classes of Europe. A lot of that will manifest itself in the collapse of the European social safety net, a bad example for the world, including American workers, which will accelerate the trend to European fascism, another desired goal for the American billionaires. I think this is hard to understand, as we have rarely seen anything so stupid. As I see absolutely no guillotines, Europe is apparently happy with this. Don't get me wrong: the US has a huge pile of additional problems which its empire will not survive, but none of these problems is rooted in decisions made about Ukraine.

Why Did the West Learn to Embrace Fascismâ€” Again?

<https://news.cgtn.com/news/2022-10-27...> ----- In Chinese culture, water represents a series of philosophical concepts. "The wise find pleasure in water," and "The highest good is like water" - the respective sayings of ancient sages Confucius and Lao Zi, the two most famous philosophers in Chinese history, highlight the deep respect for water's symbolic meaning among Chinese literati of yore. Concentrating on the quiet, rolling or surging waves of lakes and rivers, Ma Yuan, the acclaimed Song dynasty landscape painter, presented a monologue-like visual interpretation of water in his work "Water Studies." Through the innovative expression of underwater dance, the program "China in Poetry and Painting" by China Media Group places the scrolls underwater, allowing the audience to immerse themselves in the artistic water world of Ma Yuan's painting.

When Bioleninism Backfires

Posted by Fred Watson Jr on October 10, 2018

Summer has come and gone. With more people out in the warm summer weather, one gets to see the state of society and the culture in greater detail. More people are out mingling. Vacations are taken. The beach calls us. Few places reveal so much about people and preferences than beaches. The beach also shows the latest success or failure in progressive social engineering.

One of the best ideas bursting forth from recent right wing websites was biological Leninism (Bioleninism). In one neologism, Spandrell explained the left's coalition and means of holding power. Bioleninism is the idea that the left assembled a coalition of people who for biological reasons would not be inclined to succeed or reach high status due to their abilities or natural traits. This is strong glue to make them loyal to whatever dumb or insane idea the left spits out, as well as support whatever economic shenanigans benefit the true owners of the party. Bioleninism is beautiful in its simplicity.

Do you really believe that if we magically got rid of all the non-white people that rich & poor would suddenly start getting along perfectly? that the Zuckerbergs, Bloomborgs, Bezoses would share their wealth & start treating the downtrodden as equals? It's easy to confuse the one for the other, particularly if you live in a place where there is a large ethnic underclass - but remove the "other" from American (or western in general) society & they will create a new "other" out of what's left.

Just had a yucky thought, when Peter or George mentioned Kissinger. 100 years from now, if Kissinger and his fellow fat European world-domineers end up restoring serfdom and installing it in the US, he'll be looked back upon by the nobles as the great hero of mankind, not as the most harmful being ever to have been allowed into this country. The un-armed, landless serfs, effectively slaves, won't know that 100 years ago their great-great-grandparents were gun-toting homeowners and merchants who allowed their freedom and property to be taken by a conspiracy of fat European world-domineers because they were afraid to be called conspiracy theorists or kicked off Twitter.

Well this hits close to home. About 60 miles from my house is one of Monsanto's big plants where they make this stuff, and I've done work there. A bit closer, 20 miles, is another small plant which imports pure glyphosate from

China in railroad cars and dilutes and packages it for the retail market. If you've ever bought a Roundup knockoff that wasn't from Monsanto, it almost certainly came from this other plant. So I think if you drop a hydrogen bomb on me you solve this problem... -- 3 rumbles

North Carolina's Cape Fear River is a massive water system. It stretches across the lower half of the state, collecting runoff from 29 counties and providing water to millions of people. But in the city of Wilmington, where the river meets the Atlantic Ocean, the water has residents worried. ----- In a 2019 test of tap water, Wilmington and neighboring Brunswick county were among the top five areas for high levels of PFAS, or per- and polyfluoroalkyl substances - a group of man-made chemicals commonly used for making nonstick or water-resistant products. Now North Carolina is reckoning with the legacy of pollution upstream and discovering what decades of PFAS contamination means for the rest of the country. ----- darkwaters.participant.com/

RedKahina [quite a while ago, during the incident in Belarus with this Ryanair flight] on Aron Mate:

But still: have things gone so far that a Brooklyn Bernie Bro spawned by an environment his associates increasingly defame, in familiar style, as degenerate educated, professional urban liberal/left elite like Aaron MatÃ© can bring forward as his authority on Ukraine a veteran NATO Gladio super creep Nazi â€” bona fide, unabashed Nazi symp who spent his career running stay behinds in the hope of a revived Nazi Europeâ€” who proposes the mythical medieval Khazar Khaganate, which resulted in a Galicia overrun with really nasty Jo000z like David Ben Gurion and "the family of Moshe Dayan", as ultimate secret wooo woooo protocolsy cause of the events in Russia and Ukraine today?

Quoting Jacques Baud, with Michel Collon:

this region that stretches from the Baltic to the Black Sea, now Poland, and Ukraine, was, made up, is the remains of the Khazar Kingdom, where there were effectively many Jews, and in this region, in fact, also developed a considerable anti-Semitism. In fact, the founding fathers of Israel, Golda Meir, Ben Gurion, Moshe Dayan, or the family of Moshe Dayan because they moved to Palestine, but all these people came, effectively, from this stretch of territory, in Ukraine and Poland.

anti-Semitism ::::::::::[alive and in mirroreversive act out mode cause]

..... those who devised and carried out Stalin's strategy of confiscation of the harvests, was the NKVD, ancestor of the KGB if you like.

.....[and those cabals have migrated a continent away but pretend to target their own roots in an act of contrition, purification, self criticism, cleanup coomerism with telltale hasbaratline gigsig Nature .. The whole Opretense has them act out like Lucky Luke, performing that back of every edition's split second shadown beating spin .. except that is draaaawn out and out and up and away timestretched to the pretty exact length of a complete century].....

RK: Alas, the imperial ruling class, MatÃ© joins Baud in lamenting, is still just too innocent to contend with a world full of these wiley, genocidal JudeoBolsh Khazars and their maligned victims

Cliff High on Khazarite name stealer widthread C'er 'JBL' --Apr 18:

Those Zarahites, feeling like they didn't want to be in Egypt anymore and not being recognized by the other children of Israel since they recognized Pharez as the line of Judah, went by boat on what many call the first exodus out of Egypt and it was the ruling class (rich class) of Israelites (aka Hebrews) and guess where they sailed? to the area we call Greece and Troy and guess what? they are the ones who founded those places and where that society began ... they also later founded Rome .. then the blonde Milesian kings (yes, descendants of Zara ... founded Zaragoza hence the name ... where do you think the Iberian Peninsula (Hebrew Peninsula) gets its name?... many have known that the original Spaniards were blonde as Helen of Troy was blonde ... those Milesian Kings then went up into Ireland and those are the blonde royalty of Ireland for the last 3,000 years ... you will find they have Semitic blood as they are descendants of Shem just like Abraham, Isaac, and Jacob and Moses and David and all the tribes of Israel

Pharez and Zara lines of Judah end up with the coronation stone Greg Hallett [who is not mentioned] claims to have traced ['divined'] and dug up.
Heber son of Shem = Hebrews .. called Judahites Jews [a S+N split]

The southern kingdom was still in tact after the northern kingdom was carried off and they last another century until, in 585 B. C. Nebuchadnezzar and the Babylonian Kingdom took them (the Jews) off into captivity and the final Davidic line king (that regular history knows of) Zedekiah, had his eyes cut out and was dragged blind to Babylon ... oh but this is better than Star Wars (don't get me started on Kazarian misdirect being used in Star Wars; to them Jesus is Darth Vader) ... Babylonian law doesn't recognize female heirs to the throne ... Hebrew law does ... Zedekiah had daughters and they were the prophet Jeremiah's granddaughters as one of his daughters married the king (once again the priestly line of Levi was combined with the kingly line of Judah just like Christ would be as Mary was tribe of Levi obviously since here sister was a levite married to a levite but i digress) ... last we see Jeremiah and those royal daughters, they are in Egypt ...

$7 * 360 = 2,520$ years then they would remember who they are ... from 721 BC to 1800 AD is approx 2520 years ... in early 19th century, there was a big movement in England as the people began to realize they are the Lost Tribes ... then satan came in with bunch of nuts like Richard Brothers who said he was the rightful King of England ... the same corrupt ones in Bible Societies cut important parts out of the Bible (down to 66 books instead of 80)

Murdering indians : a documentary history of the 1897 killings that inspired Louise Erdrich's The plague of doves
----- It is too much to hope that by growing to understand each other the Indians on the west bank and the non-Indians on the east bank of the Missouri River can by their own example model enlightened behavior for other groups that have refused to try very hard to understand each other â€” Republicans and Democrats leap to mind, as do Jews and Arabs, and management and unions. But it is not too much to hope that we can all come to understand the obvious: that feuding is both feudal and futile, and that those strange people on the other side of boundary rivers are just as decent as we are.

Those held in contempt cannot expect help to heal

... but if a lo opinion triggers hi alert and effective 'terrapi', watch out, things will start 'looking up'

I hope you like my take on Hi Bred Hybrid NeoCononized NaZioBolshis

lefty's plausibly deniable battering ram-penplan availability is a measure of their missionary zeal, attrition,

suffering and capital destruction. EMJones' 'jewish revo spirit' gets to conduct the masses and amasses ...

stubbornly clinging to message immunity [no reception, no processing, no admision, no contrition, ..

holding on to 'forever molecules' and the like to act and carry their biocidal traumas out and about]. I call a halt.

RK on race [28th of april txt, recently auded]

Red Kahina ---- Mar 20 ---- On That 'Mass Formation' Thing By The Way -- More Hors d'Ouevres

I Mass is the death of spirit in landscape, blood, and form.

I Race is the spirit of grace in landscape, blood, and form.

II Mass is the eclipse of what was once real.

II Race is the perfection of a possibility.

III Mass is the fate of all the worst.

III Race is the fate of the few who excel.

IV Mass is equality and its attendant terrors.

IV Race is the exception, and the rights due to it.

----- In [Maximillian] Delmar's book, sixty-five pages separate these two "decalogues."

Her Gramsci quote is ornery, a wrongheaded inversion of present reality but also a channeling of truth pre chemical industry's microterror reign, all arage rite this nonoo allwoo now, ... before the latter took 'the best of times'; her [sub]title indicates none of this:

"Varieties of Spiced and Sweetened Horseshit

.... Gramsci's Prison Notebooks, numbered 14, that I return to repeatedly: Romantic conception of the innovator.

According to this concept the innovator is someone who wants to destroy everything that exists, .." --snip

i pause to remind you what happened before russians began actively stopping neocononized naziobolshis cannonfodderizing their neighbours and the latter had previous episodes a century earlier on the dot!!!
----- nazis went after / were out to get / headed east to stop this: russian harassing and harnessing bolshies

This Tide Has Turned, as i said, a Century [On The Dot almost] Later and.. russians go after / come for / had enuff of being granted none other than 'or else' quarters [and 'taking it' to the bogus bonus tune of 10thou casualties in 8 years] in order to stop neocononized naziobolshis who train ukies to harass and sacrifice russians..

.. [and Ukies themselves in the process, all too ample evidence of that already ... i dread to elaborate on the fuckfleshtrade behind robbing Ukrainian females of those who have proven to be a woefully ineffective deterrent for decades - who knows how soon we will hear the true culprits justify their evil deed by saying they were merely meting out justice to failing 'heelmeesters' falling to lambs led to slaughter with very misguided ideas of who and where their true nemeses were and are] quoting RedKahina some more:

"Here is what Aaron MatÃ© entertains the Greyzone audience with, Ã propos of those white house trained, sponsored, armed, and directed death squads: This is why, today, Ukrainian extremists are asking Israel to apologize for the crimes of communism, as the Jerusalem Post notes. This is a far cry from Vladimir Putin's "rewriting of history." -

RedKahina sees an acceptance of this in GreyZone Mate's choice of guest: JBaud

["his authority on Ukraine a veteran NATO Gladio super creep Nazi â€” bona fide, unabashed Nazi symp who spent his career running stay behinds in the hope of a revived Nazi Europe â€” who proposes the mythical medieval Khazar Khaganate, which resulted in a Galicia overrun with really nasty Jooooz like David Ben Gurion and "the family of Moshe Dayan", as ultimate secret wooo wooso protocols cause of the events in Russia and Ukraine today?"]

and words it ['for' him] thus:

"Nazism was a program of self-defense against Jewish domination,..... "liberators" in Eastern Europe. Nazi invasion of the USSR and the extermination programs, ... reasonable, even necessary policy, if unpleasant to have to carry out."

Baud [with Michel Collon] on Lviv:

" remains of the Khazar Kingdom, where there were effectively many Jews, and in this region, in fact, also developed a considerable anti-Semitism. In fact, the founding fathers of Israel, Golda Meir, Ben Gurion, Moshe Dayan, or the family of Moshe Dayan because they moved to Palestine, but all these people came, effectively, from this stretch of territory, in Ukraine and Poland. Why? Because they were quite simply chased out â€” just after WWI there were extremist groups who struggled against them all â€” And these groups we have to today in Ukraine are the descendants of these extremist groups created in the 1920s."

Baud makes perfect sense here:

"extremely immature leadership that we have in the West in general. That's certainly the case in the U.S., but I think in this example of the Ukraine crisis shows that the European leadership is not better than what you have in the U.S.. It's probably even worse, I think, sometimes. So, that's what should worry us, that you have people deciding based on nothing, and that's extremely dangerous."

baffling i am exceptional in very and not so obvious, actually most ways, more than i ever realized, and prolly still don't fully. Some of these 'plutopist' ways [visions, recipes, 'best of' memories barred to most] would, if understood and practiced, pretty soon so thoroughly transform ways lives are lived and run their course, suffering would diminish inversely proportional to pressures brought to bear between rock, it's all a matter of 'gratefulness'.

One of the times i am least comfortable and least grateful with that way things 'nou eenmaal' are [dutch sentence construction, sorry] is now ... i have to bear the brunt of awareness ... [and the frustration i fail and failed to transfer, transmit, relay nor pass it on and around]... all by my lonesome along with a few higher profile and concomitantly more harassed, banned and canceled observers, info sur and purveyors, that this guy and the entire US establishment celebrate the zenith of Bolshie aspiration as the flowers thereof personified .. but not at all so beautiful as they think of themselves, on the schizFlip mirroreReverse!!!! very deadly and their biocidal tox covers generations, continents already ... with surely many of and 'in' that mindset do not plan to make halt at a mere single planet

ps: what could Stalin have 'accomplished' with a handful of Kommisars like this? Holodomurder of the entire world's graingrower population????????????

Ukies are learnin to see life both ways now and still somehow

strife's deludzions do appall ... yet again ...against the grainfallowgain fail to shock some sense into leaders leavin {{{glycine torturing special genmodiffoesateyeable}}} biocide fixers free to try dial in worldwarppitch to get their rocks up.

in other words, Ukies got shattered n scattered from the BolshNaZ clash/fuse ... zioconned from the east and now, a century later again, ground too good to leave be, zioconned n neolimped from the west.

first by Stalin who let {{{his}}} jews do their worst in order to be all the holodomore justified in prosecuting them for it ... which is what the nazis came to help him with until, after mentioned pause with lots of transfers, name, place and rep switcheroozioic hybriberee goin on, the whole shoah[MUST GO]down burst to life [sets upon partially healed, nativitated / naivitated, Lethe soaked prey yet again]. This time hiding

complete in- and perversion of praxis behind continuity of stated purpose.

Jews want to retake Israel but not russia khazaria / ukraine [to which most calling themselves jews have much more affinity]? think again.

They throw their prey / scapegoat at a target with lapsed datemarks and intel coordinates [those of their very own peers in fact, the very ones that propelled them, taught them the ways of impunity so as to prolongate and greatly expand, metastatize, .. 'engrain' the sins of those predecessors .. it's as close as they'll come to confession and purge ... a reparation payment that actually just continues their vested interest], rapacious and illicit gainmotives under fake and toxic color of orwellian 'damage is beautiful', gayed pride, damaged pride .. truly truant doxtroonage.

the Ukies thus abused and meme propelled throw themselves upon the sword like a Galatian selfcastrate at the behest of duh Ukie whisperer behind them who dangles a mirror in front of him with a fishing pole like the donkey cartdriver who tied a carrot to his whip ... it's vulgar pretense time travel throwin money at a containment job long ago that has proven to be a catalyst for the waterbed / swarm effect; diffusion by violence; perhaps our only hope is to locate the genes for it.

Please help Ukies see their culpritmodel needs an update urgently, their target / nemesis / harassers have long since leapfrogged and shockwaved [easy to trace via the commie vs nazi fights in germany, etcetera] positioned themselves to shoo the avengers ['verhaalhalers'] into a 'front', the deadly defenses of reformed and recovered former victims who wised up from the whole ordeal and have none of the deluded notions and pretense that stalin never 'turned' on {{{his}}} staff and the purge is up to them, they are the ones going to free the russians from jewish oppression ... and they'll never ever need to face imminent 'past-' and postexistence

i say we do a Lenin replay and make me the next American prez whisperer Anybody wanna help make that reality?

or better yet, a gaggle of poetpietistic scholars turn my work into 89 versions, a suitable one for every age so all heads can roll with it make that times eight [x8 .. hattip to Andrew Lehman neoteny.org]

brill spark landed in my purview just now: ukies are performing the initiation rites of becoming european .. if you take the first WW as the atrocity that monster was 'hereikt' upon .. no offense to 'eiken' intended of course

2
..WW as the atrocity that entity was monstified upon ... the satanic sacrifice to follow up and refresh the burial of Cernunnos under Notre Dame, the up to then most succesful [in the way of benefaction .. all that stuff 'tartarians' are jamming around but can't seem to actually hit, let alone dig up and never mind revive] globalist ...

.... if you take bloodspilling as a metastatication of all that, wonder not that 'hereiking' was not a return to oaks at all but further barring of and distraction from them

i put it slightly differently under the vid, ending with: .. no offense to 'eiken' intended of course

Lab 257 is the perfect antidote to spilling the beans on cheap clean ubiquitous energy generation rigs innit? Nobody in their right minds could hope to avoid abuse. Then again, i am hoping RWE solutions will evolve quickly to offering protesters with such inventors amongst them [as i once was, when they dug themselves a decade less into 'THEIR' hole] a different solutions: ok kids, stay in your treehouse, let us develop this doohickey and own 10% of it right beside you, the rest goes into a foundation dedicated to lobbying for, if not direct punishment of illegitimate and illicit use [a patent with direct ties to stipulations and earmarks of use and application may be very novel but full cyclonomy can't succeed without a perfectly polarized, centripetal 'polarientation' [LO vs NoGo]. i for one, won't settle for less].

Alastair Crooke "The Most Egregious Mistake" -- bottom lines:

" To admit that Russia 'has won' would be akin to saying that the 'Ponzi' will have to 'close the fund' to further withdrawals (just as Nixon did in 1971, when he shut withdrawals from the Gold window). Commentator Yves Smith has provocatively argued, 'What if Russia decisively wins, yet the western press is directed to not notice?' Presumably, in such a situation, the economic confrontation between the West and New Global Order states must escalate into a wider, longer war."

So, Frog slowly gayified [ever overlay a 'hi'tec || pollution map w a dim dhimmy demografftfee .. i mean demzogrofo din one?].

Then successions of 'tree fall outers' gave rise to, not cover dispensers [badly needed, calling all permies, no not you BoC, you fake champion u] but dispensers with cover, venturesome braves bleachin away. Yellies [missing in v-sign action, are they even tryin to bribe Ukies?] are in the so far mixedly blessed process of a bad habit 'undoin': doin without if not losing cover altogether [the ones that made it onto dah turtle isles largely healed up in this respect, early adopters as it were .. but sadly, buried under said overlays till further notiice].

Possibly. Would glyphosate be gone then by now. Yeah. Would i have gifted the world with my inventions
instead of feeling more misanthropic than ever, wanting the type of 'tokkies' who nearly did me in to
never ever benefit from anything i can but won't do? Did they choose to come live next to me looking for

Did the hold of parasites that had a hold on me manage to leverage my deed as a break thru exemplary

As opposed to my hi falutin aspirations and attempts to inspire good deeds rather than focusing on doing

All in all i've given a definite signal nobody in his right mind can wait for me to lead the mob [as i did on

Damage and shame pay for a type of wisdom that can be deflected and realloyed into future harm. Thus, remembrin an ancestor's colorcoat from a tavern in more frigid latitudes doesn't kindle rainbow family meme and practice [and certainly not my upgrade / amendments] ... but illusions about 'return' to where they cannot possibly recognise and acknowledge you .. if they did in the first place .. other than as sacrifice / buffer / relief sluice / decanter between innies and outies ... jews know the art of feeding this node stack poser posish [those who turn hyped fetishes and 'figurins n out' of attention funding scheuclapflapchatter- into adding to the piles of very filthy lucre, with gambling always forming the bulk and core of it, bumping to the surface here, then there].

Odd tho, how little my activities changes thru my illness despite all the interruptions and the strong reductions. dutch radio four hour long friday nite question call in show attempts 'woke' [D=wook] def. As it happens a large publisher has just added it emphasizing the over emphasis [exaggeration]. Third tier and down testie level zogdemog imposing their prefs on First levellers .. and sure, the toxtec of the latter does cause the former ... like all the ammo in the Ukraine plus the slaughter of the very perps will swing the balance towards a huuuuuuuge wokie win before long [the deep tragedy of Putin's handling of heavy weapons with as cavalier and kid glove a way as he can to ask every day: have you had enuff, will you give in now ... how about now??]

The callers of course do not reason thru to such depths of consequentialism but stay on the 'pettery' surface, carefully avoiding heavier varieties of those even while they mean to imply that non procreative diversity must be acceptable, 'normalized', legalized, and yes, celebrated. What they fail to make clear however is how they will apply some chimeric brake here and stop the slide into their lifestyle choices - why stop there? - being imposed, yes, becoming dominant .. casi belli even, Sure, i agree up to a point, sexual diversity IS a better way to provide some pushback to runaway growth. a better variety of penetration than w vajabs or mining equipment on a mission .. but ... to exxagerate = overdrijven. .. Another meaning: 'drift over' [as in clouds]
as we're working with lenses here, direction matters as much as lighting [mirrorage effects], a polar complement would be wegleggen / wegzinken, doorweken.
Try mention 'toxtural wokism' as a neat and obvious parallel to cultural marxism and you'll get exactly as many denials as you do regarding climate issues, asking a 'grootgebruiker' [lover of bigger and blusterier 'broom n broar'].

Let me attempt a definition of 'woke' myself:

waggelism' á°fammes waggel is a character from the 'animal peopled series of adventures Marten Toonder worked on for over half a century. His work is better than that of Walt Disney. My honest opinion. WW is a goose focused on feasting and fun. Balloons play a huge role in many scenes involving him.

But nothing beats the man whose parents or caretakers blew his fuses with repetitive balloon busting scenes .. to the point he is a genuine 'balloonsexual' -- 16 years worth proof on youtube. A Guide To The DisOrient -- Epigraph - Red Kahina

Feb 4 ----- Gramsci, in The Modern Prince: In its most widespread form as economic superstition, the philosophy of praxis loses a great part of its capacity for cultural expansion among the top layer of intellectuals, however much it may gain among the popular masses and the second-rate intellectuals, who do not intend to overtax their brains but still wish to appear to know everything, etc. As Engels wrote, many people find it very convenient to think that they can have the whole of history and all political and philosophical wisdom in their pockets at little cost and no trouble, concentrated into a few short formulae. They forget that the thesis which asserts that men become conscious of fundamental conflicts on the level of ideology is not psychological or moralistic in character, but structural and epistemological; and they form the habit of considering politics, and hence history, as a continuous marchÃ© de dupes, a competition in conjuring and sleight of hand. "Critical" activity is reduced to the exposure of swindles, to creating scandals, and to prying into the pockets of public figures.

The Politics Of Soviet Famines Under Lenin And Stalin | Hoover Institution -- 780K subscribers
7,192 views Feb 7, 2023 --- Hoover Institution | Stanford University ---- Famine punctuated the first three decades of Soviet history. Disputes over Soviet famines have long been among the major controversies in the historical field. Historians debate the causes of Soviet famines, including to what extent they resulted from or were exacerbated by deliberate government policies, while demographers disagree about their death tolls. Three specialists will discuss similarities and contrasts of the three major Soviet famines: the so-called Volga famine of 1921â€”22 in the aftermath of the Russian Civil War, the famine of 1932â€”33 amid the campaign to collectivize agricultureâ€”memorialized by Ukrainians as the Holodomorâ€”and the famine of 1946â€”47 in the wake of the Second World War.

disagree with argumentation of minute 37. Could be that 'pre turnaround Stalin' fell for the Kommisars as much as the Ukies fell bycause of them. 'Izans' or more precisely 'sizan' flipped the other way ... and alQaida is in whose party?

==== Ry: Everyday I see the butthurt from spergs who think Zionism = Jews in general. Funny bc that's the same

stance as the far left ADL and Israel. Jews aren't a race and Zionism is an ideology not a biology. But for the sperg, ideology comes from biology. They're wrong.

I agree with cognitive abilities, but not ideology. Political ideology for most people isn't rational its psychological and dependent on the mass media. Change the media it changes the ideologies. Look at all the idiots that wore masks (of every color) most ppl dont think at all

Mar 4, 2023 Red Kahina: I'm reminding everyone of the CIA's plan to distribute bomblets disguised as Christmas toys to poor children in Nicaragua, that was foiled by the Sandinistas. THE FAKE lefts and fake former lefts now left apostates have the gall to seize the opportunity of the current crimes, affecting themselves, to use them in a bogus menu choice in order to romanticize the perpetrators themselves, institutions, interests and individuals: it is no coincidence that the winteroaky larouchie gang bring forward the Sandinistas as an avatar of (((Satanic Science and Rationality))), against life, and try to portray the Contras as the inheritors of the spirituality of William Blake and Red Cloud. Also in the former case, for rhetorical raciological reasons, they image a Lone Genius, rejecting all Marxist historiography including Thompson's persuasive book about Blake's affiliation with a Sethian sect movement (Mugglestonians). The aim is to restore/reproduce 19th century AngloSup RacioCosmology

Jacques Baud is not a conservative. He is a gladio counterevolutionary agent, an extremist crackpot, a psychotic complottiste, holocaust revisionist, holodomor fabulist pseudo-historian, or more likely merely pretending to be one, as part of his intelligence service actual job

john stepping @johnstepping -- Feb 26: honestly this stuff keeps getting pushed. Well known infowars types embrace this crap. The half educated love this as it simplifies everything and allows them to tacitly support the status quo. Its utter rubbish of course.

Quote Tweet TikHistory on Hilter Socialist @SLCSocialist

Sean Delier @SeanStinson17: Oh yeah, communism and fascism literally the same thing. Which means SU and Germany were on the same side. I'm so clever.

john stepping: its stunning how many people think that, though.

Lacenaire: Yet for a year you have been insisting the USSR run by Khazar Jews carried out more genocidal imperial aggression than Nazis, that the SS were heroic liberators of Ukraine, and that leftists have been mendaciously attacking you for revealing this forbidden truth. This you, yes?

Sean Delier @SeanStinson17: Perhaps read the context before shooting your mouth off.

Lacenaire: What context? The context is you and stepping need NATO's permission to notice the existence of the azov battalion, so you have to say theyre avenging the joolodomor or Gladio Baud won't let you mention them?

That's your excuse?

Sean Delier: Dude, like John said. Fucking READ. I didn't say this. Stepping didn't say this. Some arch reactionary NATO goon accidentally acknowledged that AZOV are literal Nazis while spewing a tirade of anticommunist gibberish. Are you dense?

You are not supposed to feel sol with the injured or those who in their trust in regulators or under pressure let their kids be jabbed. You're not only to forgive but to ADMIRE the perpetrators of the programme, those who duped the former into letting their kids and themselves be jabbed, who lied and postured, who said they'd seen this and that 'SCIENCE' and data that now it seems their dog chewed up so they can't produce it, who pretended to KNOW, who demanded deference to their knowledge and their brevets, and who now are pretending to KNOW again, but something else. Wormwood -- 3 hours ago [at 7:18am] ----- 26:28 Testosterone has a multitude of effects. It may even make men
gregarious and reduce feelings of anxiety. It's argued that one reason women are so jittery is because of this
relative lack of T. --- I think it's dumb to say that a bodybuilder being more willing to start a fight is due to T. Roid

rage is a thing, obviously, but a simpler comparison would be cost/benefit analysis. A gigantic man who works out could probably do a lot of damage, could take a punch, and may already have combat experience, giving him a tremendous edge. Some woman, with a fraction of his strength and no combat experience, would be more likely to lose. That's not T making one a psycho and E making the other docile, it's a purely rational thing. --- Literally. Imagine that bodies are just shells or costumes that people can put on. Imagine a genius AI consciousness that can drop into these bodies. If you're in a larger, stronger body, it is entirely rational that you would be better at fighting and this able to use that strategy more often. Smaller build? Better spec into something else. ----- As for Audrey, it's obvious. She's a woman. She can't fight men. So she picked on children. The men she killed were unarmed and surprised, whereas she had multiple firearms and a plan. She wanted to kill people and made a rational decision about where she would get the highest kill count. She still failed to get a high score (women). ----- It's like when women become criminals in any other context. I mentioned that men commit more of most crimes. One example of a crime that men rarely commit is the deliberate poisoning of a child for social status and emotional gratification. AKA Munchausen's by proxy. Women serial killers get higher kill counts because they usually are "angels of death" who inject insulin into unconscious old people. They want to feel powerful, like any criminal, but choose their victims in relation to their physical frame. To be a criminal is to be a bully, and Audrey could only bully little kids and unarmed middle-aged school workers.

That's my generosity and the decency of a return policy disrespected, tortured and destroyed. --- Alas, i too indulged this meme in my life and it came to to thus far maximum personal peril only 2 years ago,

Wormwood: Are you asking about castration cults like the Skopsky? Do you mean the Galatians of the Bible?
Sorry, I'm not following.

Skoptsy. The Skoptsy [1] (Russian: "eunuch") were a sect within the larger Spiritual Christianity movement in the Russian Empire, best known for practicing castration of men and the mastectomy of women in accordance with their teachings against sexual lust Skoptic Syndrome is a body dysmorphic disorder characterized by the desire to be eunuch, named after the Skoptzy sect. The Skoptsy movement emerged in the 1760s from the flagellant sect of the Khlysty. Its founder was a runaway peasant, later known by the name of Kondratiy Ivanovich Selivanov, a former adherent of a Khlysty sect of one Akulina Ivanovna in the Oryol Governorate.[6] ----- The Skoptsy may have had as many as 100,000 followers in the early 20th century, although repression continued and members of the sect were put on trial.[11] Increased repression and collectivization under the Soviet Union reduced the numbers to a reported few thousand in 1929, when the authorities staged a widely publicized mass trial against the sect.[12]

George, there's a beaut dutch word: 'spartelen' [said of fishes] 'tegenspartelen' = +resist against / German: sich strauben ... back to dutch, tegenstribbelen ... tegensputteren = grumbly objections.

The pop controlites live docility and will induce it via poisons weakening vital juices of all sorts .. a given. And they'll fight defenses like HCQ, Artemisia [about which the WHO made a point of letting it's jealousy over hi regards known in 2019 - as you say, "i have the docs .."] via the slew of vids in german about that plant venerated of old .. and coming to my doorstep to rescue even before i was in trouble and IT was victim of the brutality that escalated to use of a poison in the last days it was legal for ordinary trash [perfect excuse to make a neighbour one's accomplice, recipient of generous surprise] .. how could they know i was watering doorstep weeds or why and so forth.... the judges around here would swallow it as whole as they leave Chemours / Dupont 'whole' - wholly unhindered to turn one of the world's most precious deltas hazardous in spots .. which they already did [kinda like Shell in Africa i imagine].

Anyways, the protocolish diabol[IT]ik diktates creation of poisonage ops to reduce any flapback & slapdash like i said, on the one hand but more importantly, to create that 'off' chance a nerd savant results on the other ---[one in 10M will do as long the average invention ensuing allows 10M to move left {{and if they move a bitton of nonstuff, no matter, same fungible diff}}. and get up to all the shite the right is and cannot help but be and remain right about - a stance weakened to the extent they themselves indulge

Kevin MacDonald --- @TOOEdit: The late Roger Scruton, *Modern Culture*, p. 138: Deconstruction is therefore self-indicating, and provides the culture of repudiation with its spiritual credentials, the proof that it is "not of this world" and comes in judgment upon it. Of course that subversive intention in no way forbids deconstruction from becoming an orthodoxy, the pillar of the new establishment, and the badge of conformity that the literary apparatchik must now wear. But in this it is no different from other subversive doctrines: Marxism, for example, Leninism and Maoism. The U.S. Government is Guilty of Domestic Bio-Terrorism – But Who Will Bring the Criminals to Justice? Christine Dolan interviewed Sasha Latypova, a global PHARMA regulation expert, and Katherine Watt, a U.S. paralegal, on how the U.S. Government was able to murder and cripple millions of Americans with bioweapons, called "vaccines", as a military operation.

The COVID-19 "Vaccines" Are Weapons Developed by the U.S. Military
With more of the American public waking up to the fact that the COVID-19 shots are linked to the epidemic of "sudden deaths," these rushed-to-market emergency use authorized (EUA) "vaccines" are gaining more scrutiny..

ps [end of may]: just today heard ian masters say that fiscal discipline prefs are "treason" ... i can add 'loss' [as in vapor lost to space when the grounders, the vulcanos take a break / 'vacation', are delayed, betrayed - the water weaving thru cloud and soil in hop skip jump weather patterns can be choked out and dessicated by ag, and the quicker the more modern it's damn near biocidal means lately]. the easy money left acknowledges no bounds to dogooderee, massification, piling the needy into towns, fleecin production to pay for it. This 'insectation' / miniaturization erodes decency and stability, even the very gene pool itself. Glorifying aid n rescue schemes are exactly as worthless as the polarly opposed punishment fetish. True therapy cannot start but from calming this wild teeter totter pendulum swing. So do the center thing.

As a broad brush observation [for all to see near and far ... but few capable of writing with it] one can say the 'quantic' demografixation [reflected in profit = offspring above all equations and prescriptions] is very bursty n swarmy, springs leaks for biocidals to surf and serve disservice washing the deserving down and out cause 'leftie at any price and all cost grows satanism and sanctimoniousness surveilled simultaneously, a fakery tide.

Plus, past a certain scale, debt redemption becomes almost impossible. While capitalism requires us to be responsible and "pay for" what we do by offsetting consumption and saving for it, communist credit theory places no such requirements. We can continue to print money out of thin air and obtain what we need for free as long as the debt eventually swings back around and is "redeemed."

Nullified? ... as in huge companies are told to take a hit for the wokies and in return can quietly 'get rid of' toxic' assets? which our grand benign redeemers will mercifully take of their hands???

After the 2008 crisis, that balance sheet expanded from \$1 trillion to \$4.5 trillion and we're way above \$4 trillion now. ----- Here's the problem: It took 5 years to redeem \$750 billion in debt and only four months to re-monetize half of it (\$375 million). It would take roughly 30 years to redeem the Fed's current \$4T in debt, but that's assuming

nothing goes wrong.snip.....

Trying to get something for nothing with money printed out of thin air will still cost us, first with unsustainable resource consumption levels and later with hyperinflation. ---- also see: NESARA in a Currency Reset: v=gdr8L1gwkX4

'me too' called wrong [violent vs forceful] masculinity 'toxic' for many years before it dawned on me that ... wait a minute actual and literal toxicity does a few things, first and foremost [as well as most overall] .. it demasculinizes ... or is it 'demasculinates'? ... in the kinetic sense and by some compensation process, substitutes with autism. And our prob is that some ruthless cabal has discovered this long ago and manages to monetize / weaponize that 'extreme braininess' -- the latter half of this equation began to dawn on me via Andrew Lehman's work still available at neoteny.org

anthrax in Holland of the 60s

i guess only blue marks get to send messages? ... failed w D and M

hey mark, George has me blocked still but i'd like him to know ... stuff if you tell him in your words of a few sentences i'd be more than satisfied .. and it may be of interest to you too.

some remarks sparked by the now 20h old space:

twitter.com/i/spaces/1yoKMZEMVenGQ === 1h44m i get mp3s here: [audiolabs.io/download-space](https://www.audiolabs.io/download-space)
tweeted it out yesterday [but no reply]:

42nd minute [thereabouts] G hits the nazis with an opening kindness [literally a merciful letting go back] stolen from them, but also moved down the timeline without inside out and against [warning ingrates] turning mood, prospect, sacrifice and offer changing parts of it given any consideration, not even short shrift, not any, let alone fair .. yet pretending it was an out of the blue first act ... classic zio move ya start and restart a story but never earlier than halfway in so as to keep up ... you name the crimes ...

1h44m long WebSpacee 20 hours old says [@ 1h20m]: "this goes all the way back to the 1880"

- i am thrilled to hear Webb utter a truth that also, by happy happenstance coincides with the one i tried to hammer up, on, out and about, to wit, the appearance of Julius Helsen in front of a fledgling yet grossly pharmafiyosely rigged court

ANTHRAX in Holland

re the dutch pioneering the bioweapon field ... an early memory of mine is being with my father dealing with anthrax cases and the off-limitness of the burial grounds [good luck with that on peatsoils below sea level].

i do not recall what they named it .. but i can tell you he was a billiard player, motorcycle man and pugilist ... he dodged marriage troubles for months and months at the time. Mom never gave up and even went to a casino with him and me, about 5, in tow. We didn't go in and when in front of a cathedral later i thought the same would apply there. Diffrent vibe but kinda offworld [l]y too ...

i've only lately gotten clarity as to why dad began checking the quality of frozen meat arriving in Rotterdam from Argentina by ship, sparked by a few years older man who admired him and is retired from being a naval electrician which took him to arab countries and eventually china .. with a gal he rescued in some arab bar or something ... she speaks a few words of dutch and the snackbar --- once ran by the man who worked for and saved with my father to afford it [i used to run up and down sometimes lengthy drives to deliver a few ounces of sliced breadmeat wrapped in factory fresh plastics ... the reason i am neither man nor woman really ... from the little Morris van he was driving for that purpose] --- is now chinese owned and operated.

Sorry got distracted from dad's duck and go for a few paras

I am now happy to perceive it as an ethical move .. but instead of an encircle || zoom in || secure || extirpate progression, it became a set of separate and for the most part, cause unpolarized [..... that takes .. 3 ... {{the break{{{ers}}}} thru binareeee!!!}}, the wit and sweat of our George Webbsies in but not of this world], 'tolerant routines with all the sooner or later epidemiological consequences 'vandien'.

'Sit u way shuns' kinda froze [due to success so wild the state came to take it's cut RETROACTIVELY as if my father was the one perping the pharmafiyose crimes he was merely working around to show disapproval - his bloodline took 700 years to move 40 miles .. go figure].

So the growth hormone side of pharmafiyosity persisted. He found ichemAG dope as distasteful, debased, harmful and denaturalizing as it was but his 'free' trade dodge not only proved no recuillier pour mieux sauter but caused a meanwhile grown massive prob: bottomline falsifying footprint unaccounted for iow, it became a FASCION, a neolib scion, zio after a fashion and the 'transportation nation' memes were born, lifted hitching rides in my fathers raging cartpully bullish wayzwake [fastest man in Rotterdam behind the wheel {{the other guys used americans but not hotrods}}, never no accidents ... like i was on pedals in Amsterdam 35 years later on abandoned and liberated brigs i used second hand spokes to keep fit .. a big messenger race was organized in order to tempt me into proving myself but limelit phoniness of dutch mediatics were already turning me off big time, that part at least].

Ten Questions For Bob Malone About 9/11

Simple Questions To Get To The Truth About Windber Research Institute, Flight 93, The Shanksville Crash Site, And 9/11 Anthrax Attacks ----- Recently, it has come to light that Robert Malone's boss, Nick Jacobs, at the Windber Research Institute, was meeting with a former Mossad agent and a US Special Forces Army Ranger about anthrax screening at the Windber Lab that morning of 9/11 before Flight 93 took off. Flight 93 crashed 16 miles from the Windber Lab, and Windber Medical paramedics were dispatched to the site and spent all day combing the site for any signs of survivors and evidence. Robert Malone testified in an affidavit filed in November 11th, 2021 filing in the Middle District of Florida lawsuit that he was employed at that lab during 9/11.

A radioactive cloud from Khmel'nitsky is approaching Europe

Now it's official. Secretary of the Security Council of the Russian Federation Patrushev said that the radioactive
cloud that arose after the explosion of an ammunition depot in Khmel'nitsky (where a large number of depleted
uranium tank shells were destroyed) is approaching Western Europe. An increase in the radiation level has been
recorded in Poland. As the British used to say, there is no need to worry about this. Our military must have
understood before the strike about the prevailing wind pattern, and they are now watching the consequences. The
main threat from such munitions is the serious increase in cancer in the medium term, as confirmed in Yugoslavia
and Iraq. Now in Ukraine and Europe.

RK sends me a larger version of the quote i pinged to her. It's by a guy putting a satanist pentagram complete with goatshead next to browntone Marx snap and claiming he hated Russia.
Marx calls Russia a 'collosus'. check. He has no use for nations. check. Marx commits a hedgefail, no "explosive force of ideas" qualifying qualms and au contraire, implies it's the true march of progress fuel atlanticyst prowgrease he so kindly waved at and itemized for us, .. so that his pet fetish was to all the more easily surf the grand finally breaking crest of that long sentence by the end of it as it turns out.

now EFOI is the cabal's prospecting object and business model as i've explained in numerous threads ... but the fall out, tellingly, once again recently, happens to literally blow back [more often than forth*] as in the case of the DU ammo blast.

* = Russia has more space to dilute the pollute - a regrettable mafiya practice .. but also tending to work in its favor.

ps: i don't appreciate his denial, i mean his explicit discountery ["imbeciles"] regarding one of cannibalism expert Oscar Kiss Maerth's major premises, btw. Jewish eagerness to fuse with royal blood has a decidedly thanatopian singefringe don't you agree????

Let's just write it off on failure to scale currencies, from local, wet fecund, microfungible, instantly gratificatory realms of vital intimacies of health and hygiene, thru regional, past national, to 'universal' versions and dispersions. Is it a language problem?

Beyond science and economics lies the question of wokeness as a religion. On one level it is a distraction from religion: God is the biggest thing there is, it might be observed, and thinking about diversity makes us forget about God. SNIP So in conclusion, and this is a simplification, perhaps a distortion, but I think you know what I mean, it would be healthier that, whenever someone mentions dei, you just think ccp.

UPMC CancerThrax - Knocking Out Your Ability To Fight Cancer

stupid fancyware won't let you flatten their content ...

<https://descriptusercontent.com/published/b8be612e-2ea9-4de2-9cd2-dc38302d411c/original.m4a>

this is not the same length as what i have it's a small diff but adds to the true searcher's confusions and headaches of course

I also prepared an illustrated ten-minute summary on Rumble which you can find here.

<https://rumble.com/v2x02ie-part-1-upmc-coronathrax-to-cancerthrax.html>

CIA's low-intensity cancer warfare strategy, and I believe the UPMC is at the heart of it. The CIA's low-intensity warfare story at UPMC starts after the 9/11 anthrax attacks in 2002. Aaron Adler and I covered this story in 2021 when I was working at the citizen journalism school in Michigan.

The big idea is that the CIA, using Mossad intelligence officers as a proxy, created a Continuity of Government declaration on 9/11 with an anthrax scare (the Flight 93 crash site is very close to the CIA's Windber Cancer Lab), in order to fund two decades of development of bioagents to conduct low-intensity warfare.

"Anthrax Secret Team" in a substack entitled,

"Robert Malone Confirms Reporting On Sina Bavari, Ft. Detrick, DOMANE, And Darrell Ricke".

I am at the limit for emailing this substack post, but please return to this developing story. I will be illustrating the CIA's intentions and actions to conduct cancer knockout experiments on those "deplorables" it perceives as "MAGA terrorists" and disinformation journalists.

When you return, you will see the cancers the CIA is targetting including breast cancer, prostate cancer, blood cancers, and also chronic inflammation conditions caused by viruses using SV40 promoters that have a long CIA history of causing cancer.

More DNA proof that wheat farmers spread light-skin "white" pigmentation into Europe: SLC45A2

<https://www.biorxiv.org/content/10.1101/2023.04.24.538113v1.full.pdf>

SLC24A5 is the dominant locus contributing to light skin pigmentation in Europeans ----- We find that the region around the pigmentation-associated gene SLC24A5 shows the greatest overrepresentation of Neolithic local ancestry in the genome ($|Z| = 3.46$).

[https://www.cell.com/current-biology/pdf/S0960-9822\(23\)00189-6.pdf](https://www.cell.com/current-biology/pdf/S0960-9822(23)00189-6.pdf)

The derived SLC24A5 allele, which is carried on the Neolithic ancestry background, is one of the two alleles which contributes most to light skin pigmentation in present-day West Eurasian-ancestry populations.

Open Thread: What is the policy proposal you believe would have the most positive impact on society if it was implemented tomorrow?

Alex Kaschuta

These should be punchy enough to be effective but realistic enough to actually be of-this-world (no government-issue girlfriend pitches, please.)

My pitch: Three strikes law for violent felonies and organized crime - as in, these people will never see the light of day one way or another after strike 3. I think this would combine the virtues of redemption for someone who had a misstep or two with the extreme societal benefit of wiping out a great deal of recidivism-fueled crime, the most pernicious category of crime.

Agent Zelensky - Scott Ritter ::::::::::: As a former intelligence officer, I've been wondering why has no one done an investigation about Volodymyr Zelensky, the President of Ukraine? His rise to power, in my opinion, represents an incredible manipulation of world opinion that will go down in history as a classic case study in social psychological engineering: an ordinary comedian who came to power because he promised a long-awaited peace, who then dragged his fellow citizens into a bloody war that can only be described as a massacre.

An interesting "reaction" flag has resulted from the Gay Rights/Equal Marriage Movements of the early 2000s. The is called the Straight Pride Flag. It mimics the striped Gay Pride Rainbow by changing the rainbow colors into neutral shades of black, grey and white.

Europe and the USA have already bought into the Global Biosecurity Agenda aka Pandemic Preparedness. Europe issued its report on its Global Health Agenda in March, and it isn't about health, it is about making health the driver for the WHO/globalist agenda. No surprise I guess. But to see it in print, with lots of pretty pictures, all spelled out: well, I was surprised. Please take a look at it.

"Blowing the Lid" | Transvestites and Transsexuals | Reading -- Dystopian Deep Dives ---- 751 subscribers -- 8 watching now Started streaming 64 minutes ago

Hello friends, The other day I was watching this video:

watch?v=H-6keVsIOjo == Bev Jackson of LGB Alliance mentioned a book entitled "Blowing the Lid". It is a book about gay history and has a chapter that covers "Transvestites and Transsexuals". Shall we take a read together? I also have some relevant tabs open.

Almost every time I look into "transsexuals", especially the old school ones, I notice they all seem to be interested in the dark arts. No lie. It all started with Kate Bornstein, who is featured in another video I made that was subsequently banned from YouTube. My friend sells books and I was flipping through Bornstein's book "Hello Cruel World: 101 Alternatives to Suicide for Teens, Freaks and Other Outlaws". What was the first page I happened on? "Make a Deal with the Devil". Obviously I took this as a sign and went down an entire rabbit hole about red umbrellas, the UN and "sex work". It is one of the few videos YouTube has banned. The other was an Herbal Abortion video I made.

-----"Blowing the Lid" mentions several key characters in the early GLF (Gay Liberation Front) and this particular chapter focuses on Transvestites and Transsexuals. It covers Rachel Pollack, a transsexual who would later become an "expert in Tarot" and produce "Salvador Dali's Tarot". -----We will also read about Bob Mellors. He wrote a book called "We Are All Androgynous Yellow" and worked closely with a transsexual named "Dr Charlotte Bach" [into some aspects of the occult b/c he produced a trigram (as seen in Chinese philosophy or divination according to the I Ching) to depict "gender". This seems to be a prototype for the "gender spectrum" that Queer Theorists promote!!!!!!!!!!!!].

Mellors wrote a biography about "Dr Charlotte Bach" that was never published. "Dr Charlotte Bach" was a transsexual fraudster who formed a cult of personality around himself and his ideas. Bob Mellors and others in Bach's inner circle claimed they had no idea that Bach was really a man.

Bach believed that "sexual deviation (is) the mainspring of evolution". He was a lifelong fraud with multiple identities before becoming "Dr Charlotte Bach" after being released from prison in 1967. That is a thread to pull for another time, but Bach seems to be one of the originators of Queer Theory that no one talks about. Everyone knows Foucault, but before stumbling on "Blowing the Lid", I had never heard of Bach. Shall we read then?

Charlotte Bach - Wikipedia

Charlotte Bach (born Karoly Hajdu; 1920-1981) was a Hungarian-British impostor and fringe evolutionary theorist. Her alternative theory of evolution acquired a cult following among prominent writers and scientists in London during the 1970s, who remained ignorant of her original identity until after her death.

Drawing heavily on the work of animal ethologists such as Tinbergen and Konrad Lorenz, she argued that humans experience in varying degrees a pull towards becoming the opposite sex. This urge could either be denied or asseverated: gays and femme lesbians, for example, are women in men's bodies or vice versa, but transvestites and butch lesbians are not. This gave rise to eight possible permutations.

She was invited to speak at Sussex University and, ironically, at Darwin College, Cambridge.

In due course, leading members of London's then burgeoning Gay Liberation movement took up human ethology and started publishing pamphlets of their own, much attracted by the tantalising notion of homosexuals as the vanguard of evolutionary change.

wow, this is my fave vid of yours thus far! That doesn't mean it couldn't be better ... mentioning Andrew Lehman as an exception to the 'dark side' being inspired by Charlotte Bach. Nor are any of the 'Woo2Noo' especially interested in 'gender expression' unless you include brain partitioning and hemisphere dominance .. but they prefer the mundane, stretched across the world metaphors.

Arnold Keyserling for instance, whose father actually worked with the famous first I-ching translator Richard Wilhelm and whose travel books hiltling ethnic variation, were proolly the inspiration for his characterizing US vs USSR :: indiv [male] vs coll. [fem].

A unicke spirytuall document, more-over a practicall guide to divers fourmes of magick and politickes and, moost notably in this verye derelict century of our Lord's mynistry, A MAP INTO THE FUTURE...

Reviewed in Liverpool's "Creative Mind" magazine, 1984:

"Mr Roth maps out a voyage towards self knowledge, the same link-forging that was at the heart of Jung's work. He refers particularly to the Shaman tradition, the spiritual leaders who, in their different ways, restated this fundamentally important task."

----- Sex, Evolution and Altered States

Reviewed in the United Kingdom on 27 October 2002

This is a remarkable study of some of the main aspects of Charlotte Bach's theory of emergent evolution - which touches upon the biology and psychology of intimate relation ships, on history, culture, philosophy, and the archaic origins of religion. It is remarkable for the personal, "in your face" style of presentation. The authorial style feels a bit like being grabbed by the lapels and taken off on a tour of magic, mystery and extra-terrestrial archeology. Charlotte Bach's work emerged during the heyday of "the alternative society", the after math of 60s hippiedom and the early muscle-flexing of "The Age of Aquarius". She used to say: "I am the alternative to the alternative!" This book shows she wasn't kidding.

Transsexualism: An Unacknowledged Endpoint of Developmental Endocrine Disruption? ----- Christine Johnson -----

----- ABSTRACT

In recent years, evidence has accumulated demonstrating that endocrine disrupting chemicals (EDCs) have the potential to alter sexual development at the organizational and functional level in many species, including humans, indicating that this class of chemicals may play a role in the etiology of transsexualism..

...focusing particularly on the hypothalamic-pituitary-gonadal (HPG) axis. Recent physiological data regarding the vomeronasal organ (VNO) is reviewed, ...

...a more useful approach would be to perform demographic studies that map the birthplace of transsexuals in space and time to determine any patterns that may be related to environmental conditions.

I conclude that the existing evidence points towards chemical causes of transsexuality rather than social or psychological causes, requiring a shift in research priorities away from psychosocial studies towards physiological studies of transsexuals.

My Synopsis: public policy based on flawed vetting of chemfarm 'safety' slips us the pusher's free samples, as she puts it:

RADIAL TRAFFIC NOTE:

Roth was perhaps no hippie prof but tried out for hip proffie; quote:

"An alternative reading of the biblical phrase, is that in whatsoever ways we may choose to judge others, by that very act we become subject to the same judgment upon ourselves, if it should happen to apply to us. "

... so .. he did not quite make the full hippie grade which holds that [all of what] one condemns in others are always and only [by force of nature, something which one does recognize in and as, but does not acknowledge in, as, of and about oneself], repressed parts of 'one'self. it's a ricochet recog, resistance bounce, the many failing impacts before the rock finally splits, do not take your fella humans for hammers people !!!!!!!!!!!

race thread via DH:

-----Post-Left Watch: Ryan Grim and Emily Jashinsky interviewed Chris Rufo, who is responsible more than anyone

else for the recent wave of anti-LGBTQ bills. Grim didn't once call him out on his hatemongering, but called his book "extraordinarily well-done" and "the left ought to pay attention to it".

-----Ryan Grim: You're just straight up lying. Not that I'll bother suing but this is actual defamation. Among other things, I told him his whole CRT play is just an extension of Lee Atwater's famous admission that the GOP had to revolve its southern strategy when they could no longer say out loud "n*****, n*****, n*****." ---- Interview is here <https://youtu.be/L5OXKTkt4jk>

-----Post-Left Watch: Treating him with any kind of academic good faith is more than he deserves, platforming him is unacceptable and beyond the pale. His goal is to promote far-right culture war politics for far-right economic ends and that's blatantly obvious.

---GoldenNoseSlim -- @gilgilgilgil5: you just got Rugar'd bro

-----Post-Left Watch: Aaron Rugar does not make out-of-context clips. The people who get mad about him tend to be people who say terrible things. Ryan Grim himself also claimed that Rugar is "constantly coming after him" but they've interacted maybe 5 times at most.

Ryan Grim claims he's one of the few people remaining on the left who defends free speech, and laments himself and Taibbi being called right wing because of it. He then says that Aaron Rugar is constantly coming after him, but he shouldn't be suspended and he has a few good vids.

---@spencer_sutton: You know very well that a defamation case would go absolutely nowhere.

-----Post-Left Watch: First of all, there has to be actual defamation. My post with the clip said that Grim did not press Rufo on his pushing anti-LGBTQ hate. Grim inferred that I said he did not press Rufo on the CRT issue.

-----More Perfect Left: These are all defamatory content farms who would rather bring down people on their own side than try to build a coalition - for attention and validation. I am sorry you have to tolerate this every few weeks.

-----Joseph J. P. Guarino --- @RoninJoey: Have you heard from Tara Reid lately?

-----HalalFlow: Here's a clip of Ryan pressing @realchrisrufo on whether his CRT fight is just the next phase of Lee Atwater's famous claim that Republicans had to get abstract when they couldn't say the N-word anymore -

@ryangrim & @emilyjashinsky's full interview below: twitter.com/ryangrim/status/1111111111

-----Ryan Grim: Go watch the interview or read my summary. If you've been following this account, and believing they're honest, this should be a wake up call https://open.substack.com/pub/badnews/p/our-unusual-interview-with-chris?r=60tq&utm_medium=ios&utm_campaign=post

-----Post-Left Watch: While you're correct about the dogwhistle of CRT, the far-right that Rufo leads has moved into moral panics about groomers and trans kids, all part of a far-right effort to lead a pogrom against the LGBTQIA+ community. That was not mentioned.

And WHY has it been venom based technology?
Because the entire program is about Genocide. Culling. Targeted assassination. Reduction of 'undesirables' .. Race based targeting. This isn't something "new" that Kennedy is pointing out. thank you kindly .. ironically, 3w5d later now and i just got done lisnin to fresh Devon w PeteQ and decided to pay more attention ... the name had crossed my screen a long time ago ... but i blame the glyphosate which, the second it locks my gut via its ability to turn fat into an undigestible burden and constipation factor --[a 'hump' which i use fulvine to blast over and past, combined with zeolite, to prevent the runs effect, just now 'perfectin' .. even though i first read it 2 years ago already!!!!!!!!!!!!], puts me to sleep .. i am slowly losing weight and need to hunt for remedies more actively ... but i have 2 years of disbelief ruled denial culminating in chemo [once] behind me and slowly purging habituated fats and oils intake to just be a 20 years older man and at peace with swallowing such a penalty for severely underestimating trashfury and their easy access to RoundUp squeezebottles, just ended at the time of their generous 'gift' to my doorstep 'weeds' .. witches from hell, another breeding stock the 'dutch' fuck up every bit of the world they manage to reach with. Blackpilled

So turns out my Black_Pilled account on Twitter is essentially unfollowable. Almost all my mentions are people telling me they get unfollowed automatically and my follower count goes up and down wildly between 1k and 0. I've had quite a few big accounts DM me to tell me me they've had to refollow multiple times. This is the bullshit you have to deal with when the code keepers think you are dangerous.

Sean Last ----- @Sean__Last: I think a big problem with defining your central political enemy as jews is that jews are associated with lots of good things and even if your initial gripe had nothing to do with this you end up hating capitalism, elitism, science, atheism, skepticism, and similar cool things ..and you end up liking other enemies of jews like nazis, old Catholicism etc., but they suck and this is why anti-semitism tends to turn people into insane trad commies or theocrats. Surprised by how many people read this thread and somehow thought I said jews invented these things, or are necessary for them, or that we should ignore jews as a demographic, or other things I obviously didn't say. Father had a love for big machines that could force multiply his broad shoulders and walnut-cracking biceps. The Intersection of Marx and MMT with 1Dime

Sat, 12 Mar 2022 ----- Here's an episode for those Marxists curious about MMT and MMTers curious about Marxism. Steve's guest is comfortable identifying as both. Tony, better known as 1Dime on social media, believes MMT is not a threat to Marxism because it's like comparing apples to oranges.

Herve Ryssen Sentenced To 17 Months In Prison For Challenging Jewish Version of WWII ----- Herve Lalin - who also goes by the name Herve Ryssen - has now begun a 17-month jail term at the Fleury-Mirogis prison near Paris for the three offenses, committed between 2017 and 2020.
Rest assured, HerveRyssen is now in prison because of the enormous power and control of Jewish supremacist groups like the Alliance Israelite Universelle - which is literally hell-bent on punishing and persecuting anyone who opposes their satanic agenda of world domination.
And the fake Holocaust narrative clearly has judeo-masonic fingerprints all over it - and it would be worthwhile to research the connections between Henri Monneray, the French prosecuting attorney at the Nuremberg Trials and the Alliance Israelite Universelle - the archive of his related papers can be found here.

Libido: The French Existential Theories
Indiana University Press, Studies in Phenomenology & Existential Philosophy, 1985 -- Alphonso Lingis
"Alphonso Lingis's engaging book studies the phenomenological and postphenomenological theories of sexuality of six contemporary French philosophers: Jean-Paul Sartre, Maurice Merleau-Ponty, Emmanuel Levinas, Jean-François Lyotard, Gilles Deleuze, and Félix Guattari. After centuries of philosophical silence on the matter, these writers, during the last forty years, have undertaken the first extended exploration of human sexuality in Western philosophical literature. Lingis presents the arguments developed by the six philosophers, critically assesses them, and offers his own explanation of how the libidinal body can be characterized, what the libidinal drive is, and what alterity commands in the erotic imperative."

Irrevocable: A Philosophy of Mortality --UoChicago Press, 2018 --- Alphonso Lingis
"In his latest book, the prolific writer and thinker Alphonso Lingis brings interdisciplinarity and lyrical philosophizing to the weight of reality, the weight of things, and the weight of life itself. Drawing from philosophy, anthropology, psychology, religion, and science, Lingis seeks to uncover what in our reality escapes our attempts at measuring and categorizing. Writing as much from his own experiences and those of others as from his longstanding engagement with phenomenology and existentialism, Irrevocable studies the world in which shadows, reflections, halos, and reverberations count as much as the carpentry of things. Whether describing religious art and ritual, suffering, war and disease, the pleasures of love, the wonders of nature, archaeological findings, surfing, volcanoes, or jellyfish, Lingis writes with equal measures of rigor and abandon about the vicissitudes of our practices and beliefs. Knowing that birth, the essential encounters in our lives, crippling diseases and accidents, and even death are all determined by chance, how do we recognize and understand such chance? After facing tragedies, what makes it possible to live on while recognizing our irrevocable losses? Lingis's investigations are accompanied by his own vivid photographs from around the world. Balancing the local and the global, and ranging across vast expanses of culture and time, Irrevocable sounds the depths of both our passions and our impassioned bodies and minds."

the first man to be legalistically sacrificed by the rising pharmafiya when they managed to desecrate that sorta space.

immensely tragic .. us humans can't get our head around puttering w crystals any more sensibly an exception i had the sheer luck to get to know is pim conradi .. he fashioned stacks of parallelograms out of remainder coathangerpiles and popped, nailed / wired and screwed them together into rounder and rounder shapes the bigger they got **['ik wil bolletje' was his motto, cribbed from a biscuit brand commercial. He got some facetime inspiration from 'Bucky' back in the day].**
Pim was always lugging bikeloads of waste wood and metal to his den to pick apart and piece together RIP Pim ... and forgive me for not turning your place into a 'permieuseum' somehow after you left for England and bequathed it all to me i never touched any of it .. and the squatted ex airtraffic tower building it was all planted in sorta assimilated it quick enuff

well, .. at least the focus on top criminals and pinnacle pervz .. a veritable asylum inmate parade **[complex- and toxify to bioleninize, 'left' {{as a verb}} machine memery inventive savantalents, no cost spared]** is consistent around here ... can't wait for yall to find Dr Feelgood ... in fact, it's kinda suspect he never comes up in all that jawry about Kennedy;
You want something pretty to look at? use the milbottles with a waste, as used in Vienna during the 80s,

fill w water and leave out in winter ... sleep, prepare, retrieve and study the bubble patterns or ... just give waterbottles w fresh rainwater a few good spins, film it and play slowly has anybody even godverdomme 'GoedVoorDommen' done it????
But hey, it's easy to sterilize, 'deground' [germophobicate] people to make them manageable for the evil plotters and these people will be 'happy' to work in labs.
Or try 6 3d synchronotron pyramids and study the shapes between daily changing points of interest ... as the quran says: all is number, god is number. or maybe volum votan said that .. but nobody followed his foray into the quran after his 2011 death

lobro: I managed to say "blood libel" 96 times in 60 seconds.

Jonathan Greenblatt promised to hire me if I can say it 100+ times/minute. I must try harder to qualify as brain-ADLled.

-----will moon: Hey Niqnaq, chat in Mil Summ suggests Nuland's husband is Lasar Kaganovich's great nephew, can you confirm? Xymphora was wondering about this several days ago but could not discern the actuality,

-----niqnaq: no, honestly, that sounds like a completely wild shot in the dark. I like Xymph but am quite different (I don't buy Rolo Slavskiy for example). Xymph lives in a much wilder world of speculation than I do.

-----will moon: I remember you posting on Craig Murray's blog years ago (pre-pandemic seems like another life), Skripal-time maybe, if you are the same person as Rowan Berkeley? It was around or just after that I became aware of this site. Thanks for your efforts whatever the case and thanks for your response.

I read my first Rolo Slavskiy piece yesterday and yes it seemed a stretch but I know nothing more about this person or their writing, so I can't make a judgement.. Substack is yet to sort itself out, ie what people will actually use it for. Right now, it is everything from unstarted or unread pages to Seymour Hersh or similar celebrities, apparently raking in the cash.

Maybe Xymph is more a story teller and your more a journalist? I hope this statement does not offend you â€” each to their own. I mentioned Xymph because he often includes links to this site and maybe I came here originally, thru those links. I was not trying to imply any measure of similarity or relatedness, apologies if this is how it appeared.

[The suggestion in the Mill Summ chat was challenged and answered fairly authoritatively with some sort of potentially checkable reference, so I'll check it.

I learnt in the course of asking this question of you, Lazar Kagavonich died, rather symbolically, in 1991.

----- niqnaq: I am indeed the same Rowan Berkeley. I actually started naqniq (niqnaq's's predecessor) as a spin-off from xymphora, so that's why he always links to my translations of Colonel Cassad. I wanted to give complete stories where xymph only gave a forest of links. So you're quite right about the difference. I remember, by the way, a commenter long ago describing xymph as "the diaphanous xymphora." The word xymphora actually means something in greek, though I have long ago forgotten what.

-----will moon: My search engine renders "the diaphanous xymphora." as "curiosity or creativity which transmits light".

niqnaq: nice, thankyou

The Survival of the Wisest

Author: Jonas Salk ---- Series: Bioweapon ---- Book by the father of mass inoculations, eugenics and disgenics. The main point of this book is that Salk makes the case that the "wisest" should hijack man's evolution, alter man's DNA, reduce the worlds population, force everyone into austerity, and create a scientific elite managerial class to oversee the world order.

The Paul Soros Scholarship for \$90k for a Yale Law School isn't really a Soros "payout", but the \$950 M with the Wexner/Epstein biotechs is a bad look.

@dr_cottrell's big January 2020 sin seems to be that he says Corona was bioengineered, and it used SARS spike and HIV helper proteins. Paul and I agreed on that, but he thought Ralph Baric did the bioengineering, and I said the Erasmus Lab did the weaponization because they also bioengineered MERS and SARS. We are both right in hindsight. Where is the big sin? This means you are a sellout because you threw the bioweapon red flag in March 2020?

Stupidity on a Massive Scale | Scott Ritter

Dialogue works ---- 32.8K subscribers

339,005 views Aug 25, 2023 Interviews

Scott Ritter is a former Marine intelligence officer who served in the former Soviet Union, implementing arms control agreements, and on the staff of General Norman Schwarzkopf during the Gulf War, where he played a critical role in the hunt for Iraqi SCUD missiles. From 1991 until 1998, Mr. Ritter served as a Chief Inspector for the United Nations in Iraq, leading the search for Iraq's proscribed weapons of mass destruction. Mr. Ritter was a vocal critic of the American decision to go to war with Iraq. His new book, Disarmament in the Time of Perestroika: Arms Control and the End of the Soviet Union, is his ninth.

@dianewilson6673: The fact that Zelensky was literally a clown and comic before president says it all!!

@xcrockery8080: Was Zelensky ever actually convicted of being a comic?

I ask that, because Scott Ritter was actually convicted of being a paedophile.

@dianewilson6673: both points irrelevant!!! Not sure if being a comic is a crime?? and Ritter convicted of being a pedophile??? What's the relevance to the discussion? Deal with the point at hand otherwise we can all go back a million years with irrelevant data.

@xcrockery8080: So being a comic isn't even a crime?????

What about being a paedophile - is that a crime?

Spreading pro-Russian propaganda should definitely be a crime, too.

jealousy has ways to impose relevance ... not being smearworthy is grounds of/for shame in which its blamegame doesn't thrive so it switches to flower over powerdrive smear tec is older than monkeys even maybe ... are you confused with cannibalism?

Vs: getting over and across that lifestyle divide ... duh [vulnerable /inviolable] border which definitety can range from undetectably and invisible vibe and frequency type sharp ones to vast territories, ranging from nomanslands to ravaged region to the famous hinterlands colonial times .. rear view mirror active and soon their peak thanatopian stage product [radioactivity] will be the only one left if you are you believe Clifff High's projections of extreme localization under ice age conditions ... oops back to the border between 'growbust' regions and those with too many coercions and lacunation, hardships, shorts an lacks to make one vulnerable to invasives.

that same day i rebutted 'aplanetruth 4u':

'sathanatopians' have turned the breach of infection and the antibody of immunity around - the pharmaffiose 140 year long and slow but victorious and presently cllimactic march thru the institutions have stuck to tried and 'true' [but alas, evil] needleage .. inverting and reversing cause and effect. Profiting by 'cures' and 'preventions' (which are nothing of the sort and worse than short cuts or emergency measures, nothing like proper living at all but rather quick fixes that sanction, condone and promise ability to perpetuate bad habits with impunity).

The infection thing is real but it applies and takes hold of those below certain thresholds, incredibly sharp and often invisible, more and more 'merely' vibratory frontlines of tec and memetec where timely warnings (ignored, such as my 13000 pages of notes and hints since 1996) stop without starting much at all in the first place and nasty supprises begin with the speed and range of weather systems

Replying to a long comment by DaBluntTruth there:

yeah good info .. except that viri do exist and can cause epidemics in any and every region compromised in some way or other, then travel on weather systems to the next, but the dilution and homeopathicization of that transport gives surrounding regions a chance to leaf thru their micro / cellular libraries and build a lock to capture and pacify the key gone so haywire it's become a drill with a mad spin.

This info passes at the speed of gossip, which is notorious for its height no? Thus very few epidemics turn into pandemics and a predatory pounce becomes a news item and matter of record.

The Nazi Hydra in America: Suppressed History of a Century --- English [en], epub, 3.0MB, ePub ----- Progressive Press --- Glen Yeadon

"Provocative and highly controversial, The Nazi Hydra in America reveals the dark secrets of the fascist influence in the USA. While Eisenhower's troops defeated The Third Reich on the battlefields of Europe, the war against fascism was lost on the home front, to the very cadre of American plutocrats who built and paid for Hitler's war machine. At the center of this small confederacy two firms stand out: Brown Brothers & Harriman, and Sullivan & Cromwell. And at the very eye of this oligarchy, one family name sticks out. Spanning over 80 years and four generations, the Bush dynasty ally themselves with the Nazi element at home and abroad, ever willing to advance the fascist agenda of global corporatism."

With each passing day, however, we find ourselves struggling to avoid the exact fate Huxley predicted. In this video, we discuss some of Huxley's core points as well as his weird and interesting take on the benefits of psychedelic drugs. Divagation: Disruption -- Red Kahina ---- Sep 15

The 'germ theory' of disease in the mass media, as it becomes, at once, more and more crude and more and more magical, is one effect of this thoroughgoing fragmentation of humanity-world. Ironically, pseudo-dissident defenders of this backward, mechanistic biology (e.g. Robin Monotti, Giorgio Agamben) also tend to be advocates of a mystifying, flabby pseudo-holism, wherein distinction itself is dismissed as Mara and the ruse of Satan.

This successful fragmentation, which we should picture as the obstruction (and pathologizing) of synthesizing capacities â€”the logging on to a prosthetic mind equipped with a paradigm of reality modelled on the â€”dial' as it was once called, of television channels â€” allows for the highly uncivil insistence on obedience to the worldview and biological models favored by the pharmaceutical industry to be carried out by ideologues who in general discredit the very intellectual tools they ostentatiously and hamhandedly deploy in defence of the ruling class messages. Carrying out their brief to defend the plague show, they're prancing around before their power points of comically manipulated garbage data and cartoon imagery of imagined virii, and on the other vending a mildewed anti-intellectualism from the early 20th century, those fascist pseudo-critiques of analytic anything-whatever, that is, Heideggerian woo-woo honte-ology

-- snip In the days when X files was this huge worldwide it, nobody thought to view it as excitingly reversing a gender binary by portraying Mulder the Intuitive Holistic Mind and Scully the Skeptical Detailed Analytic Experimenter. A lot of fascist ground has been recovered by ruling class' revanchist culture war with their many fronts and flags (both the pronoun-cers and the anti-pronouncers are vending humanity as a stuff that comes in pink or blue).

But these signals can all be juggled now. Endless scissor rock paper rounds. The bad White Science, the authoritative White Science, the toxic masculinity, the virile virology, the wicker mass, the wicked consumer, the funder crowd, etc etc.

1-- Derrida played with ontology as hauntology, hantologie, the knowledge of the spectral, of ghostly traces, and I want to add here honte, shame, shameology, to stress the spread of the malady of Nazi somatophobia and life-loathing which Klaus Theweleit has recorded and examined so thoroughly in Male Fantasies.

Most honoured Fruihoar Ryan, ... allow me to admonish you mildly for not [Njet .. YET] defending Josh Moon, no mention whatev, let alone a plug ... even as his occasionally expressed intent to serve the likes of U [Yes You!!!] is fairly credible but there IS a related prob: Josh can redline ['NarOMDiffrrntt'] 'too far gonerhea' of the gamosphere much the same way Ry draws completely cringe / arbitrary lines in the gendosphorium ... try the first h of 9da stream [the 8th] or a few before that ... memory serves poorly and my jotnotes aren't retrieving what i thought my characterization was at the time: noble but too sporadic to actually get my hopes up a 'hoeload'

ps: altho linked stream doesn't have that "josh moon on censorship" 50kft.com/query?query=josh+moon+on+censorship ... i'd still recommend at least the few minutes before the half hour mark, the rumble version has the rape attempted by pajeet in japan footage i guess ... and that's it for me, the not all tangents, all the timeguy

---Joshua Moon. Jul 8, 2021. 43. 18. The Internet is becoming smaller, fragmenting down national borders, and succumbing to regulations imposed by governments and various special interests. George Webb - Investigative Journalist (Official Osprey Fanpage)
George' Webb Task Force Orange Journal

I have written four books on the Erasmus Lab and I went there last year to interview whistleblowers for a week and work with Andere Krant in Amsterdam. Here is a summary.

<https://georgewebb.substack.com/p/erasmus-blood-on-the-floor-connects>

Erasmus Blood On The Floor Connects All The Deep State Mates

When I wrote the book, "Deep State Mate" about Henry Kissinger's tutelage of World Economic Forum, Director Klaus Schwab, it was about putting class Schwab into the Generalship of low intensity warfare against any resistance to world government.

Schwab was to be used as the hammer to "Whack-A-Mole" any resistance to the European Union, NATO, or a world government agenda. I expand it on these ideas in a further book about how specifically the Virus Vaccine game was to be used by Klaus Schwab, to achieve the objecting, and affect using viruses and vaccines as a form of low intensity warfare.

A great deal of additional research and investigation brought me to the main spearhead of this virus vaccine game in Europe - Erasmus lab in Rotterdam Holland, a program, primarily financed by Royal Dutch Shell, and indirectly by the Royal Dutch family itself. This research led to yet another book called "Royal Dutch Virus".

And finally, I wrote a book about the Erasmus lab itself called

"Spray It In Dutch", a lab I have been following since the fall of 2019 in a suspected release of the influenza virus in a great reset type of live exercise, complete with the Erasmus Lab's illegal gain of function work and the unbelievably irresponsible resurrection of the 1918 deadly Spanish flu.

This set of four bookLETs was finally capped off by my tour through Europe in the spring and summer of 2022 when I could finally travel again, when Covid restrictions are lifted.

So when the recent Erasmus lab murders inright after and during the visit of Klaus Schwab to meet with the Dutch Prime Minister Mark Rutte, I was immediately suspicious. But when I heard the Dutch Health Minister, Ernst Kuipers, had also signed Klaus Schwab's WEF, Global Health Pact during the Erasmus shooting, I began to investigate. Kuipers signed away a great deal of Dutch health sovereignty with us Schwab's WEF, Global Health Pact, and the timing of the shooting was just too coincidental for me.

Still more incredibly, Klaus Schwab had used the Erasmus Lab the Boston Consulting Group Remdesivir and mRNA vaccines in the United States. In Schwab's book, "The Fourth Industrial Revolution", Schwab had tried to sell Smart Hospitals with AI doctors and nurses.

The CEO of Boston Consulting Group Christoph Schweizer, was prominently featured at the WEF meeting at the outbreak of coronavirus in Davos 2020, pitching Schwab's Smart Hospitals.

BCG's Schweizer pitched Schwab's previous books about the fourth industrial revolution and his coming book, "The Great Reset".

The Boston consulting group would go on to feature Erasmus lab as the model AI hospital in their book the "Patient Priority".

Josh Kellar of BCG would devote a whole chapter to the Erasmus Lab as a model of the new Smart Hospital system. Later, Kellar would write the whitepaper with Jordon Walker of James O'Keefe fame, that gave us Remdesivir as the Standard of care and DARPA mRNA vaccine.

Jordan Walker seem to be hired as a consultant to distance call Schwab, the WEF, from instituting Remdesivir and DARPA mRNA vaccines as the standard of care in hospitals around the world.

Jordan Walker's boss, Shuang Sarah Wu, also a consultant for McKenzie, also wrote two white papers, Lightspeed 1 and Lightspeed 2, inculcating DARPA mRNA, not only into all of Pfizer's vaccine products, but also the cancer therapeutic areas the traditional cash cow of Pfizer.

Shuang Sarah Wu's employment as a DARPA AI scientist with her patents in 2013 for weak voice AI and her patents for air conditioning systems for US hospital systems in 2018 seem to indicate that she was being re-purposed conveniently to hide the true source of the DARPA mRNA vaccines.

Erasmus Blood On The Floor Connects All The Deep State Mates

Erasmus Killer Connects Kissinger, Royal Dutch Family, Klaus Schwab, And The Erasmus Lab

I saw all the effort in direct action by Dutch farmers during the summer of 2023 and the previous summer, all evaporating in one mass formation psychosis school shooting scenario.

The entire mosaic appeared to be a cast of characters brought together to create a false narrative of a situation, using mass formation, psychosis and panic to create knee-jerk acceptance of forgone conclusions. I created a term in 2017 to describe the situation of mass formation psychosis with a knee-jerk acceptance of preformed decisions called "a school play".

capitalized words by Piet:

I hope this gives people some idea of my skepticism of the unbelievable circumstances of the Erasmus Lab shooting in the S::H::O::C::K::I::N::G number of intrusions, not to say ATTACKS on Dutch and European health sovereignty --

[Piet: mitigated by the pitiful remainder actually left of that diabolically worshipped [turned into a voodoo-like, handpuppeted and PHARMAfiyologically reprehended] spectre of its waived self --

that occurred at the same time.

Artificial wombs do have another use I did not mention - testing HPV cancer vaccine. Erasmus has an mRNA cancer vaccine project with HPV (and HeLa cells, back to HeLa cells). BioNTECH was the interested investor through Jurgen Damen. We shall see.

Ok, we nailed the real killer, now here comes the Klaus coverup.

Spare a thought about Indigenes - Part of a digest about a sojourn in Gondwana land (oct 96-aug 97) also called New Holland for a spell before a new one was cast: the utterly dissociative term: Terra Nullius, nevertheless crown land, and yet prime location one can send incorrigibles down to, since it used to be so conveniently remote not realizing that conflagrations on one side can call forth precipitations collateral on the other as 1998 seems to prove beyond a doubt but one must have an eye for the obvious; Hamaker's differential effect (colder here means warmer there budging the average very little) and this year particularly incriminating for Holland since Indonesians caught the neoliberal 'big fish swallow lil' ones' bug from us good.

Now these parts are known as Ozzie land after the land of Oz which seemed comparably miraculous; perhaps not such a coincidence either. Indeed appropriate enough since, by the way,

This is what set it off ---- More than 800 Israeli settlers stormed the Al-Aqsa Mosque compound in occupied East Jerusalem on Thursday morning under the protection of Israeli forces.
Rabbis, heads of settlement associations, and far-right university lecturers were among 832 people who forced their way into the religious site compound, a source in the Islamic Endowments Department in Jerusalem told The New Arab's Arabic sister site Al-Araby Al-Jadeed.
Israeli forces imposed severe restrictions on Muslim worshippers entering Al-Aqsa and those under 60 were prevented from accessing the site.
It comes during the Jewish religious holiday of Sukkot, which started on 29 September and ends on Friday. The holiday has seen thousands of Israeli extremists storm the Al-Aqsa compound, with almost 1,500 entering the site on Monday.

Ry: Every israeli with a dead loved one should blame the 800 rabbis who raided the Al Aqsa mosque on October 5th. Here is a statwment from Hamas.

Martyr Izz El-Din Al-Qassam Brigades spokesman, Abu Obeida: On the path of the conquerors, the leadership of the Al-Qassam Brigades began the Al-Aqsa Flood battle after years of preparation and planning, and the zionist aggression reached its end in the desecration of Al-Aqsa.

The Al-Aqsa Flood battle came after years of preparation and planning, and after the desecration of Al-Aqsa and the aggression against it.

Crimes that the world overlooked and the United Nations ignored. The Al-Aqsa Flood battle was a response to them and to the most horrific occupation humanity has known for centuries.

The enemy has been unable to confront our fighters in the field for 60 hours so far, despite possessing security and military technology.

Despite the enemy spending billions on his soldiers and despite what he paid to what he calls the "elite of the elite" in his army, all of this did not succeed in the face of the moment of truth and confrontation with the Al-Qassam elite.

Our battles are still continuing in many locations on the ground, and we are still replacing forces in combat sites, sending reinforcements with weapons, equipment, and individuals, and taking prisoners.

Our fighters are engaged in continuous clashes after they overthrew the entire Gaza division of the occupation army on the first day.

Our fighters put the Merkava and military tanks out of service.

The enemy unleashed its rage on our people in Gaza, and took revenge for its historic failure and wasted dignity, bombing neighborhoods, safe houses, markets, and streets with aircraft from the air.

What has become known about the course of the battle is that our fighters captured a very large number of enemy members in all combat sites and transferred them to places of detention in the Al-Qassam Brigades.

It has become clear that the enemy's prisoners are at risk to the same extent [of IOF airstrikes] as our people, and some of them have already been killed.

We affirm that we will not deliberate or negotiate the issue of prisoners under fire and in light of aggression. The enemy must save his effort and be prepared to pay the price.

Declaring war on Gaza and threatening a ground entry is a ridiculous matter. How can this shattered army, from which we took a division out of service, dare to confront nine-tenths of our army, who are still fully prepared and waiting to enter the battle?

We say to the occupation that the era of your victories, while the nation was unaware of them, has passed forever, and the time has come for the era of your destruction and defeat.

The Al-Qassam Brigades are still controlling the course of the battle with a highly efficient command and control system, and we are ready to continue for a very long time.

Gaza war a win for Netanyahu; evidence of LIHOP Inbox

(1) The choice: Dismantling Israel, or Armageddon - Eric Walberg -- Date: Fri, 13 Oct 2023 19:55:51 +0000 (UTC)

From: Eric Walberg <walberg2002@yahoo.com>

To: Peter Myers <peter@mailstar.net>

Subject: Re: Foolish Hamasâ€they fell into a Mossad trap, and forfeited the moral high ground

(2) Gaza border stand-down - Eric Walberg

trap, shmak. 9/11 -> many radicalized, many convert to islam.

same here. zios only use jewish thinking. ie violence, conspiracy.

muslim thinking is straight forward. conspiracy eventually implodes (unless it succeeds, like pearl harbour). so it's high stakes gambling. all or nothing. which means either dismantling israel or armageddon. ie we are all jews or all muslims.

From: Eric Walberg <walberg2002@yahoo.com>

To: peter myers <peter@mailstar.net>

Subject: re LIHOP

kevin barrett: A LIHOP scenario is possible. But which Israeli faction would do it? The Mossad old guard has no use for Netanyahu and his coalition of lunatics. Would they do this to get rid of Bibi and his even crazier associates?

Probably not, because it will just enrage the extremist lunatics and put them even more firmly in charge.

So was it the extremist lunatics seizing full control, sidelining the Mossad old guard, and preparing the "horrific crackdown"? Possibly. But I doubt the extremists could pull off a Gaza border stand-down and coordinate it with Hamas without the old guard catching them.

In any case, since Israel is doomed by the rise of its loonie extremists, and Operation al-Aqsa Storm will make the loonies even loonier, it's a long-run strategic win for Palestine. Like Hezbollah's 2006 victory, it shows the Zios can be beaten and serves as a huge morale booster. Crucially, it will destroy "normalization," force the whole Islamic world to defend al-Aqsa, call attention to Israel's falling into the hands of genocidal maniacs, and generally set the stage for the liberation of Palestine.

So since it's strategically detrimental to Zionism, I don't see it as a likely false flag. Like "al-Qaeda" with respect to 9/11, the perps would have to be both brilliant enough to pull it off, and idiotic enough to want to.

Let's give the Palestinian fighters credit for their creativity, competence, and courage.

(3) Gaza war a win for Netanyahu; evidence of LIHOP

Eric, Yes, factions are involved here.

The clash over the Supreme Court revealed two factions of Jews: Globalists vs Zionists.

The Ukraine war is a Globalist project. The Hamas war will make it more difficult for the Globalists to continue the Ukraine war. Therefore, the Zionist faction caused this war.

Netanyahu's allies have called for the expulsion of Palestinians; and Netanyahu himself said that the land of Israel belongs to Jews and no-one else.

The Gaza war also makes it less likely that the Supreme Court will strike down the legislation reducing its powers. Therefore, Hamas' invasion of southern Israel, with mass killing and kidnapping, is a win for Netanyahu. It unites Israelis behind his agenda.

Hamas failed to consider that Mossad has a record of promoting extremism among Palestinians & Moslems, with a view to mobilising the West against them.

Now, terrible loss of life will occur in Gaza, and possible expulsion. Could not Hamas foresee this?

Evidence of LIHOP:

- withdrawing IDF troops from the border. You saw the bulldozer opening the fence, but where were the IDF troops?

- ignoring obvious Hamas training exercises in the weeks preceding the breakout

- ignoring repeated warnings from Egypt

- ignoring sensors which must have informed the IDF that the wall was breached (they only responded much later).

Anglophobia by Harry Richardson & Frank Salter is a rare exception -- Explains how globalists are destroying our nation's values, culture & laws -- Thoroughly recommended

Joel Davis - @joeldavisx: This is the single most important book for right-wing Australians to read on the market right now. Excellent recommendation. Churchill is the greatest traitor to the Anglo-Saxon people in history, nevertheless despite the unfortunate cover-art it is a great text for conservatives to read.

JUXTAPOZ Issue #47, November 2003

Joe Coleman - An Account of Recent Works by JOE COLEMAN,
that Old Master of Modern Madness, brought to you by GEORGE PETROS ----- "JOE COLEMAN, open your heart and reveal the real you," said the muse. And he did! Joe let it all hang out. For decades he'd soaked up awful electromagnetic effluvia: he watched too much TV!!! Filled to overflowing with America's worst, he finally cracked. A flood of TV imagery gushed from his psyche, through his delicate hand, onto virgin masonite. Pow! A pantheon of notorious television personalities, an archive of evening-news horror, a jumble of sick cartoon characters exploded. Juxtapoz takes an up-close look â€” Whenever you have a nightmare, or get scared to death, or get hurt real bad, or take a bad trip, welcome to Coleman's world! Whatever you don't want to see or feel or know surrounds you as pain, disease, and evil interact.

GEORGE PETROS â€™ UNDERGROUND ART Q&A

creativeclasstrumpsrulingclass.com

April 30, 2013 â€™ admin (Shane Bugbee)

Can underground go above ground and still be underground?

No. The mainstream art world discourages drug related material, which is the core of underground's inspiration.

Have you ever sold out? Of course. I can go both ways.

Is it possible to steal an idea? Yes and yes, and common place.

Your biggest artistic regret? Alienating myself from almost everybody with whom I ever had any dealings.

he did a nazon logo [simple overlay] with 2 info links:

Marxism will wipe away the achievements and the populations of Western Civilization. maybe it's time to put Jewish Power to work for you.

This is for people who see the world from the perspective of Jewish Identity.

etc, ... iow, identical except for the 'qualifier' switch out as above.

fatherless farm kids ... and was rewarded for it .. his provider role widened and widened .. until cut down
and slaughtered by a less skillful butcher .. i mean botcher ... a surgeon attempting an aneurysm op].

My otherness has resulted in awaking a nearly deadly hatred in peeps who jumped only sub-three figure

amount of miles to be near a daughter employed in a fulltime care institution built in a location i thought should be awarded me as poetpietbasis under any state of understanding better than it was [i myself grew up with a down sis who got 3 decades of gainful employment out of a slightly adapted assembly line factory - DSW Dordrecht].

These new neighbours of mine [if only i had prevented them moving in in the first place, ... i have said ... all wisdom in this rant pure hindsight] saw fit to poison me with RoundUp, at a moment it became, after YEARS of legal struggle, no longer something every iddyid had within 'off the shelf' reach .. [did they dump illegal substance illegally?, cared to 'suprise' me? ..that word in dutch shares root w race btw ... and yeah, glyphosate seems to break bearability when it comes to genetic burdens, listen to Zach Bush, Stephanie Seneff, etc. we're waaaay past 'turnin duh frogs gay' here].

They poisoned a doorstep dandelion i 'had designs on' [had watered in anticipation of consuming zone 1 herbal blessings .. i do and don't mean the free pdf design here: hortus.nl - a carddeck w 'stoepsteen / straatsteenspleetplanten'].

It is now my belief and hopefully i can contend this in court someday[once over the afterglowburn of this monstertrauma and assault on my soul by unknowns behind a barrage of hard and veiled borders], their action was one of malice and hostility. I had given them a perfect set up to cover it with an excuse i am sure 99% of presently presiding judges will grant them validity and desculpability for: they were just helping me weed .. riiiiite???

..... an inversion of their actual complaint about my greenery missionarIZum tainting their sterile prefs - i got the height of summer temps indoors down 20 degrees celsius with that green and tho recommended on the radio nature program aired during sermon time on sunday i got all kinds of grief.

On top of the manicure / cover / decency prob they got jealous Re sound happy children make [and i mean deathly jealous, alas, per hindsight] .. which added up to make them 'giftig' ..dutch 'anger' = poisonous, literally.

Resorting to actual poison became a very small step and so they turned my life inside a second time. [another aside, sorry]: the age of kids associating with me had steadily declined one year per year; testimony to eagerness, not my direct doing, all came to my door uninvited [welcomed but not invited and i didn't vet for parental permission, doctor's note or anything of that true volition subverting schedulage] and though i welcomed enjoyed and allowed intimacy, i always made sure to do so fairly passively, responsive but initiatory only and especially in so far as i tried to teach them about the most tender precious and fruitful aspects of life .. lessons crucial to life, the very crux [Krexno!! look it up!! How to help rock get along with water, .. imperative knowhow!!!!!!!!!!!!] of it, the axis / pivot / 'de as' around which life unfolds and spins off in that happy dizzy makin i had these kids flock to me over in the first place!!!!!!!!!!!!!!!!!!!!

I repeat, well aware of dangers leaving room for any and all rigruinin hasbarattie slander 'constitute and cause, that i went for the crux of life, adapted to a lesson easy to take in and learn by all preteens, in my experienc, NOT the crutch of whoever's life led them to expose itself to me as painted [over] by 'others' [one's neighbours, .. supposedly direct witnesses riiiiite????] ... as pedo danger, ... but who here sifts for fineries? the proverbial and long since chimericalized 'kniesoor'? .. [prolly more susceptible to chemical degradation than ordinary mortals, huh? Sigh].

Where was i .. yeah, ... the looks i get since then ... half the kids now think i am a monster covid happened to kick in at this, that very disastrous time and everything went dead dead dead and the streetlife still hasn't revived. i plunged into a sea of psychodenial [plagued with glimpses of the the suicidality making peeps like Socrates very famous] and despite ever more excruciating symptoms did not actively choose the path to recovery for months and months. A year later i broke w pharmafiyose emergency scenario after a first of 6 scheduled chemo sessions and luckily i have now, 2 years later, figured out enuff natural remedy to return my focus to the wonders of life .. as long as and whenever i succeed in avoiding the neighbours [prolly a severe blow to their pride contributing to their 'giftigheid' {{animosity}} in the first place, come to hindsync of it]

i am dealing with a very hi rank bad black witch [who in spite of it all, continues living next to me {{w her genetically damaged brute, sire to an lifelong istituzionee}}, with impunittee as we speak!!!!!!]

For an audio introduction on how Robert F Kennedy was hot on the trail of Oswald and his connections to bring in Nazis into New Orleans in the early 1962, here is a Twitter space that I did on the topic. Robert F Kennedy was closely associated with Charles W Lyons, a hand-picked Boston Catholic from the FBI. McDuff fits that exact same description being brought into the Kennedy White House at the same time in 1962.

We will be keeping a close eye on the Suez Canal situation, but a perfect storm seems to be aligning for Avi Braverman and Danny Rothschild for a false flag in the Suez Canal using their Hamas infiltrators.

We may actually see Avi Braverman's interest in a "Passover Virus" or a "final solution virus" as Stan Pottinger called it, and the corresponding final solution vaccine, play out over the Suez in the coming days. wasn't it none other than Danny Rothschild just a few miles from the "anthrax crash" at flight 93 in Windber, Pennsylvania on September 11th?

Isn't the Mossad secret laboratory in the Pennsylvania Hills in Windber located there as well, financed by the billionaire Rales brothers and Les Wexner?

By the way we checked out the Victoria Secret and Vanity Fair "underwear factories" in Windber, Pennsylvania, supposedly employing 500 people each in their heyday. We found them to be Mossad fronts, not larger than small general stores employing only five or so employees.

The Lex Wexner "underwear factory" employees seemed a lot more like Chinese PhD scientists working on Gain Of Function viruses function cancer vaccines.

As always, thank you to the great researchers, all around the world that keep our validation verification the best among all citizen journalist outlets.

They took some of what [Washington] offered, kept what they could of their old ways, and created new ways to be who they were. Indian societies shuddered under the shock of assault, and then held.'

"...George Washington is arguably an exception. Indeed, based on the evidence that Calloway provides, he was the only prominent founder to invest his enormous prestige in a just solution to America's Native American dilemma. And in the end, even Calloway concedes that "the nation-to-nation relationship between the federal government and Indian tribes today in some ways resembles that which Washington, in many of his writings and some of his policies, aspired to establish.'

"The pioneering anthropologist Lewis Henry Morgan would have agreed. In 1851 he noted that in Iroquois belief there was no place for white men in the Indian heaven, "but an exception was made in favor of Washington."

Gaza is about to be totally ethnically cleansed. Auctioning dead baby shots to the international media has not worked out. What next for Hamas? What next for The West Bank? What next for...Jordan? And what next for...Syria? What next for...for...for...Southern Lebanon?

Watching Bi Bi at work is like predicting the behavior of Elton John at a bum kissing contest. You don't need any expert opinions. Do you have some light batteries?

This will be a slaughter, and not of Jews, or not even Russians pretending to be Jews. But of the continual male ego insistence that if they can kill and be killed enough, the home of the largest organized crime cult in the world will...fall down?

Ry: Lee fought against a white separatist named Lincoln and a slave holder named Grant. Lee also helped win the Mexican War, and served as a college president and founded a law and engineering school. His accomplishments spread much further than just the War between the states.

General Lee had nothing to do with the kooks at the Unite the Right rally. Those people were not from Charlottesville and not a one of them had done a single podcast about Lee or any monuments. James Fields was a yankee from Ohio. The tiki torch dorks were White nationalist and Neo Nazis. Their issues mainly centered on mass immigration, jews and white replacement. Nothing to do with Virginia History, the Civil War or monuments.

Ryan Dawson:

Why does Trump support Israel? Trump is pro money. So when it came to Saudi Arabia or Yemen he chose Saudi. When it comes to Israel or Palestine he chose Israel. However when it came to Ukraine or Russia he chooses Russia. He saw no point in invading Iraq or aiding ISIS in Syria. This very cold businessman way of looking at the world is still a threat to the matrix because they all want Putin destroyed. Putin put Jewish billionaires in prison. Thus the entire Zionist media attacked Trump from day 1 and they of course tried to act like Russia helped him get elected.

Trump is very anti Iran bc he realizes you gotta pick one Saudi Arabia or Iran. The Saudis are mad at Biden for even teasing the Iran deal. (Which they'll never get). And the result is he got neither. Trump just picks a side and he sides with the largest oil reserves.

This pisses off the system. Because even amoral business sense can go against Zog. The whole green agenda climate alarmist thing is dead. Why not make peace with North Korea, why invade Iraq or Syria? Why stay in Afghnsnistan? Stop letting China rip us off. Close the border to illegals. Arrest shop lifters. Lower corporate taxes.

That is Trump. Now he has no moral ideology. But neither is he immoral. He sees the world as deals and trade offs.

You can like that or not. There is so much room to improve. But as a pragmatist, the rest of them suck so bad that Trump is the least bad bad option. At least until we get a couple a full years of free speech via Twitter. Then people like me will run for congress.

the blog is by a Wi 35yo .. who said this in 2015 [at 28yo]:

Having studied some Karl Marx, Pierre-Joseph Proudhon, Gustave de Molinari, and Max Stirner in a radical political theory class in college, my attraction to Panarchism and polyarchism developed out of a desire to reconcile free markets with fair markets, find a truly voluntary socialism or Communism, and reconcile non-territorial expressions of market-based political theories (namely, Agorism and voluntaryism) with non-territorial expressions of Marxism (namely, the National Personal Sovereignty of Austromarxist Otto Bauer) and non-statist expressions of collectivism (such as consensus-based and unanimous democracy).

But this was as far as I could get by myself. The work of John Zube and Will Schnack have been very helpful. I don't know where I would be without John Zube's astute cataloguing of anarchist thought and his consistent voluntaryist approach to political and social problems. Neither would I "not a student of economics, mind you" know where I would be, without Texas anarchist Will Schnack's application of economics to anarchist theory, most notably in his formulation of "Geo-Mutualist Panarchism", which is a union of the theories of geoist Henry George, mutualist Pierre-Joseph Proudhon, and Panarchist Paul Emile de Puydt.

---No. XLII., lines 9-14 are noticeable, since they set forth Campanella's philosophical or evangelical communism, for a detailed exposition of which see the Civitas Solis.

--# Scientific communism was to be based upon two immovable pillars.

-----" The customs described by these authors show, moreover, that these savages do not allow jealousy to stand in the way of sexual communism, a man who refuses to share his wife being considered churlish, in one class of cases, while in another no choice is allowed him, the matter being arranged by the tribe.

-----John founded the Oneida Community upon the proposition that everything should be in common, including husbands, wives, and children; from the broadest possible communism his community has regenerated into the closet of stock

-----Universal communism was established in 3412, none being permitted to own, or even to claim, the exclusive use of any portion of the planet's surface, or of any other property except the share of food and clothing allotted to him.

-----I am aware that to some minds such indiscriminate extension will seem like an educational communism, on a par with benevolent schemes for redistributing the wealth of society so as to give everybody a comfortable income all round.

Dugin: The Middle East: An Eschatological Scenario

The Palestinian uprising begins in the West Bank and East Jerusalem. Fatah cannot contain the situation. Seeing Israel carrying out a full-blown genocide in the Gaza Strip, the Palestinians launch an all-out revolt. The IDF continues to annihilate civilians in the Gaza Strip. There are growing protests around the world against Western, pro-American liberal elites standing unanimously in favor of Israel. Hezbollah gets involved and crowds of Arabs from Jordan break through cordons at the border. The U.S. launches preemptive strikes against Iran, which is increasingly involved in the conflict, and they launch strikes against Israel. Syria enters the war, attacking the Golan Heights. There is a rapid mobilization of the entire Islamic world.

How A Jew Became A Nazi - a Gott Mit Uns (God With Us) production by Jews for Hitler ---- 337 views --- The Cryptic

CORRECTIONS:

NAPOLEON: I have come to change my views entirely on Napoleon over the years, and I wish I could remake this
video since I have become much wiser from my mistakes. Napoleon was not an atheist, nor was he fighting for
England and their bankers. He was a much greater man than I ever gave him credit, a man who even Adolf Hitler
admired.

1. It was Napoleon who stopped the revolutionaries and genocides and brought order to France as the streets ran
with blood. Even though he conquered the Church of Rome, he still established them as the Church of France,
while the revolutionaries were murdering priests.

2. Napoleon never intended to sail to Jerusalem and establish the Jews in Palestine. Napoleon had done
something much more amazing instead. Napoleon would gather all the greatest minds in all of Europe, such as:
engineers, archaeologists, historians, scientists, artists, and all sorts of various scholars, to send them on a mystery
voyage with his fleet, to a land Napoleon only told his closest Generals.

Everyone assumed that Napoleon must be heading towards Jerusalem, and so some newspapers fabricated some
stories and people were made to believe in such nonsense as I did. The French fleet landed in the ancient lands of
Egypt, Napoleon wanted to sever England's trade route through Egypt. But because of Napoleon's love for history,
Napoleon had planned something that would change the world forever and connect us to the past like never
before.

After Napoleon had conquered Egypt, his secret army of European scientists and scholars would begin to unlock
the greatest secrets from ancient history and establish a study we call Egyptology today. After the British Empire
had emerged victorious, most of the spoils of war would make their way to England, where the greatest treasures
from ancient history can be viewed by anyone today.

I cannot begin to tell you how much I have come to respect all the sacrifices these people made, until you learn
their untold stories and learn about how much blood, sweat and tears these people sacrificed so we can know the
things we know today.

I hope to share with you all the knowledge I have acquired from their sacrifices, knowledge that has left me
speechless, where I now know for certain that the only person who could have written the first five books in the
Bible could have been an Egyptian prince who lived in Egypt during the second intermediate period, when Assyrian
Hyksos were ruling the Northern Kingdom of Egypt and had enslave the true Egyptians and everyone loyal to

them. Isaiah 52:4

EMIL MAURICE: Emil Maurice is not half-Jewish in the end. He was either one-eighth Jewish or one-quarter-Jewish. However, Erhard Milch was half-Jewish through his father, and he commanded the entire German Luftwaffe logistics from 1933 to 1945. My point was, Hitler wasn't some Jew killing maniac, he valued people who had merit and honor, to the point where all of Germany trusted the son of a Jewish pharmacist with their entire German air force. Arno Sptiz was a half-Jew who was awarded three Iron Crosses.

ABRAHAM LINCOLN: I have come to learn that we must treat the American War of Independence and the American Civil War EXACTLY how we treat WW1 and WW2. In the American Civil War, the only states who were forced to free their slaves were the Southern States or "States in rebellion" - according to the Emancipation Proclamation, the Northern States and Generals were actually the last people to free their slaves. African Americans were much better off in the hands of Southerners, who were accustomed to them, rather than the Northerners whom most had never seen an African man. Many of the Northerners had shares in many of the mismanaged plantations. I now consider the Southern States the good guys who truly wanted to abolish slavery, which the rich industrial North was taking advantage of. Instead of freeing the African Americans, they enslaved the entire nation.

ALEXANDER I: During the Napoleonic wars, it's important to understand that this was really a battle between Freemasonry/Protestants, and the Jesuits/Catholic Church. Napoleon really took the world by surprise and almost derailed both of them. You couldn't be a powerful European noble at this time unless you were loyal to one of the two factions, and the life of Mozart will teach you about his struggle between being a Catholic and being a Mason, which cost him his life in the end. Frederick the Great was a Freemason who even Hitler admired, so it's not so black and white, and we do not know what happens behind the closed doors of Kings and Lords. Emperor Alexander helped the Freemasons murder his father Emperor Paul I, who was loyal to the Catholic Church.

Keith Woods and Oedipa Maas follow Uberboy: Nietzsche saw the Jews as primed to become a core part of the ruling class of the future West - to understand this; it's important to keep in mind his vision of the next 250 years -- He saw that the Old West was "falling" - in a way like Rome --- He saw the colonial empires, the Christian Faith, and ruling royal families all crumbling --- This was quite the prediction in the 1880s when all three stood at the peak of world supremacy. He instead saw we were moving towards a new era. He saw the Jews as one of the races most ready to adapt to this era. The globalised decentralised world that has arrived in the last 100 years fits perfectly into the style of Life the Wandering Jews have lived for centuries. While we European tilled the soil as farmers and fought for territory as princes. They focused on abstract skills that travelled well: Banking ---- Accounting -----

Writing ---- Tax collecting ----- Merchant Trading

Or indeed dirty jobs that were easy to spin up in a new area: Prostitution ---- Alcohol ---Drugs --- Spying ---- Loan

Sharking ----- Pawn Shops

None of these were honourable; even the "straight jobs" were nerdy. The brave European aristocrat would delegate banking, taxes, or accounting to his wife or a Jew. He would focus on conquest, war, and territory - the manly pursuits. But our era changed all this

Industrial machines ended the farmers way of Life and noble war became an industrial meat grinder

All of a sudden the abstract realms of Banking, Academics, and Theatre revealed themselves as the true seats of power

Control of the grand cultural stories through cinema, education, and book writing. Control of perception through the media. Management of the flow of money through the financial system. Dying in a trench meant nothingâ€¦ sitting in a boardroom deciding where the trench was dug was everything. Nietzsche knew the Jews had honed the perfect skillset to find their ways into these boardrooms

â€¦so much so that he could see them ruling the West as a replacement for the Catholic Church - a secular Intellectual caste of "priests"

But, he had a hard caveat to this. All rulers need legitimacy. Some form of a "divine right of kings"

The European peasant could kneel to the mighty German knights because they were badass Supermen who mastered violence

But, how could the European bow to a tribe of neurotic intellectuals? They "hustled" themselves into "position" through deals and negotiations? Many were scammers, nerds, and often dirty pimps. That's a humiliating master to take orders from. So Nietzsche asserted; The Jews would have to win the respect of the Europeans for them to be accepted as "leaders". And he saw one way they COULD do this. They play to their strengths. They could present themselves as Geniuses. This would put forward their "best archetype". The Jews could win us over through distinction in our Sciences, Arts, and Literature. Well, Nietzsche nailed it. This began to take place at the start of the 20th century; Einstein, Richard Feynman, Oppenheimer are all examples. They began to win the Jews a great reputation: "These wonderful and creative people, who produce so many talented intellectuals! Quite useful in the Military Sciences as well!". But Nietzsche warned that this is precarious. If they fumble the ball they would lose the respect of the Western people and "they would lose the West like how they once lost Egypt". This makes me wonder. The Jews secured this good reputation with the Boomers. Jordan Peterson talks about their divine talents with teary eyes. To him, every Jew is the next Einstein or Feynman. But now the younger generations are digging through their dirty laundry. The Zoomers are reading about usury, pornography, and media slander. Sam Bankman Fried, Alvin Goldstein, and Leo Radvinsky -- Top this off with the idiocy of mass migration, which has left many Westerners feeling deeply betrayed by Jews. What does all this mean for the People of Israel? What does Old Jehovah have in store for them? Time will tell ---- Based off this passage read by @ApollonianGerm

Nietzsche's words themselves are better than any paraphrase I can do -- The foresight in this is astounding! Nietzsche's Prediction About the Jews --- A fascinating section of "Daybreak".

this comes after a long 'incompleteness' complaint but you yourself never mention the elephant in the room; lack of fairing duh fighting ... quite apart from the biowar aspects the tec disparities were so utterly howlingly insulting to heaven and hell alike that any and all concepts of war, contest and spoils in the sense that nature triggers these all the more, the nearer participants approach equal entitlement to limited prizes ONLY!!!!!!!!!!!!

'Israeli' Diaspora Minister Amichai Chikli, from Yamina, and 'Israeli' Heritage Minister Amichai Eliyahu, from Otzma Yehudit (Jewish Power), have both just called for the nuclear obliteration of Gaza.

Chikli, a Golani Brigades commando and Shayetet 13 operative who is invoking the Hannibal Protocol to the extreme, said an atomic bomb should be dropped on the Strip because the lives of 'Israeli' prisoners are not more important than the lives of IOF.

And Eliyahu, for his part, said nuking and re-colonizing Gaza is an option because "there is no such thing as uninvolved civilians in Gaza. They can go to Ireland or deserts, the monsters in Gaza should find a solution by themselves. The northern Strip has no right to exist and anyone waving a Palestinian or Hamas flag shouldn't continue living on the face of the Earth."

Chikli is the son of Tunisian-Jewish Rabbi Eitan Chikli, a contemporary of the hatemongering leader of Tunisian Jewry Rabbi Meir Mazuz. And Eliyahu is the son of Chacham Shmuel Eliyahu and grandson of former Chief Sephardic Rabbi of 'Israel' Mordechai Eliyahu (L.A.) both of the famed Iraqi rabbinical dynasty.

Both of these psychopathic Hiroshima-Nagasaki-enthusiasts were trained in yeshivas. And lest we forget, those infamous nuclear holocausts that claimed the lives of hundreds of thousands of Japanese Gentiles were designed from matzoh ball soup to charoset by a throng of Jews.

Once again, this ain't about "white, European Ashkenazis"... Nor "secular" Zionism. In fact, it ain't about Zionism at all. Chikli and Eliyahu are Arab, Mizrahi and deeply devout Jews who are speaking from their Judaism to "utterly destroy" who they deem enemies. Jewish supremacism... expressed by Jewish supremacists. All other descriptions belong in the trash. FTJ DTI KTK L3Y. ----- @Cultures_of_Resistance

Alexander Dugin -- @Agdchan: Daria Dugina chose the pseudonym Platonov and devoted herself to the study of Platonism and Platonic philosophers. The American A. Whitehead once said that the entire world's philosophy is nothing but Plato's margin notes. By engaging with Platonism - we get to the centre of the typhoon, to the heart of the problem of meaning generation, of the creation of thought structures, of the mind, of history, of cultures, of civilisations...

Dasha knew this and deliberately chose this path. The way of the mind is dangerous. People fear the mind like fire.

Once, the city authorities of Athens had the wisest thinker of Greece and of all humanity, Socrates, executed; the people of Alexandria murdered the Neo-Platonic philosopher Hypatia. ===== Today, the elites of the Western world hate free thinking in a vicious and totalitarian manner. ----- Natalia Melentyeva

page 738 of 'happy nationalism jewideyots!' the 12th was k37, spectral earth, DE6, .. so the 7th was a 6monkey Mandela Effect ... 1st I hear of it, so i had to look it up.

Comment on The Coudenrove-Kalergi Plan: White Genocide by Design (Part 1) by lobro - 07-10-16 21:26

None of the snopes.com examples apply to me because i have been so clued out of mainstream for so long. So my first thought is that it is manufactured in kabbalah mass psychosis shop working overtime to at some point dictate every iota of what we perceive as reality ... this is perfectly doable because humans are a social bug, emotionally tethered to the hive which is now almost wholly jew controlled. i am also convinced that the theory of parallel universes is just plain jew bullshit invented in order to get them out of the karmic tight spot, namely, *"I cannot be held liable for the crimes and atrocities i committed because in any number of parallel universes I am a model of moral propriety so it just befell me to act out the bad character in this one, it is the luck of the draw and i am merely fulfilling my manifest destiny as dictated by the LAW"* (jew always falls back on the law he coined out of nothing) Because parallel universes cannot interact and remain separate, a logical impossibility that also grossly violates the immutable physical law of conservation of information, this is nothing but Jew's attempt to negate the Truth, Devil's greatest enemy. More on CERN and related issues. Maybe one in 10,000 people has a healthy understanding of even basic quantum mechanical algebraic underpinnings which require a fair bit of math tools. And this is just basic stuff, it zooms off from there into all kinds of esoteric spheres, most politically controlled by Jews like Ed Witten (string theorist) who can pretty much say whatever he wants and because of his political clout no one dares call bullshit on him, eg, the finest mathematical physicist today, Roger Penrose merely says sarcastically, "I don't understand it", so the Jew scifi writers take over and spout utter halachic hasbara that openmouthed masses absorb reverently. This is no longer science, none of it is empirically provable so it is as rabbinical spellcasting as holocaust, the original Mandela Effect. Lie is distinguished by retinue of legalistic boobyguards that prohibit examination of facts and evidence on the pain of temporal damnation, death of career, freedom and even the physical elimination. Truth is distinguished by eagerness and cheerful acceptance of testing and investigation at all levels, the more, the better. Jew shies away from even approaching these subjects because they expose his fraudulent method. A fine example is the Turin Shroud, the history's most investigated object that the science attacked mercilessly in rush to explain it as a forgery and this inquisition has been ongoing for over a century without even approaching the ability to recreate such an object. One might think of it as the numinous turning the tables on the science: "investigate this!", since science prides itself on having usurped all religions and replaced them with the empirical method and related theorizing. Yet this object keeps eluding their frantic swings at the amazing $\pi \pm \text{ata}$. But returning to the Mandela Effect, it is nothing but the boiling of frogs, which is why Jew has been working so assiduously to fragment the contiguity of our thoughts and experiential processes until in the end we resemble bricked up hard drives with badly corrupted files missing headers and so on. Christianity used to be one reference point, a moral hitching post, now uprooted and trashed.

A priceless run down on the twisted sects of Judaism. It sure makes gassing them plausible and desirable.

i go:

contra your description, i have a much more humane solution; finish the wall around them, reverse guards / guarded roles and

make sure copies of 'Tree Crops' and similar stuff (permie manuals, etc) are free on demand; keep it up a few generation

(we're talking nuclear waste vigilance here) and something wonderfully restored will grow out of it.

Similarly, build a few more miles and miles long guardwalls here and there to absorb what Michael Hoffman calls Talmud

belters instead of bible belters.

<https://plus.google.com/+poetpietAKArst-tt/posts/GnAVv3yaG17>

there's a simple solution: complete the wall around israel and reverse the guards/guarded roles?

Yes I finally got triggered into making an atheism video. One big reason I don't generally do this kind of thing is because there's nothing I can say on the subject that hasn't already been said infinitely better by Hitch and others.

i think tibetan buddhism is closest to filling a drum with rock and churning it with the stuff that fill ravines, lakes and floodlands with the stuff all sense and nonsense can be sustained on; i was 'so free' to drop afew design hints on my digital crumbtrail ... look forward to devastating critique and 'bubblepricks' .. but remember my bubbles are the irrepressibly primal puddle kind, too numerous to enumerate and suppress all of them .. no matter how much prolongation & metastatization of the series DDT, AOrange and Glyphosate we will yet suffer.

Netanyahu's Kabbalah Plan to Destroy the World ---- All the primary sources which prove that Netanyahu is following a genocidal script written into the Old Testament, Talmud, Midrash, Sefer Zerubbabel, Zohar, Yalkut Shimoni and Rabbi Joseph Crooll's The Fifth Empire to pit Iran and America against each other as if they were the Persian and Roman Empires. Just as Persia destroyed the Babylonian Empire which ruined the first Temple and sent the Jews into 70 years of exile, the Kabbalists plan to use the Iranians to destroy the European descendants of the Romans who wrecked the second Temple and drove the Jews into the diaspora. Meilynrey ----- 5 hours ago

Did you know: Booby Kennedy threw a gala after the scamvakseen was introduced. Guests were REQUIRED to have had the vax in order to attend. When questioned by some in alt health circles, he blamed his wife Cheryl. Who wears the pants in that scumbag relationship? Other than Shiva, who else is speaking out against Zionism? Unless people wake up from the decades old hypnotic stupor trances, the zionists will destroy the world and enslave the survivors. Soâ€¦ wake tf up.

They've purposely strangled economies, encouraged the so called "refugees" to storm the western countries, poisoned generations with their crappy allopathic medicine including those vakseens, screwed us out of our freedoms and then cry "anti semite!" when we complain. Don't ever question these people. And yea Vivek ramaswamy is a scumbag fr. -- SMH

apparently [george webb details it in his work on Vivek weeks back] product sabotage to cheapen / ruin the price is a given take over tactic in the queen protocullican tentacle / Department of ['care'fully veiled/draped] patentable 'histolity' but Shiva doesn't go that far in his explanation of 'scYummeme'

Next time you drive just swerve and hit a stranger with your car. Tell the police you were just defending yourself and that the random person was actually on your sidewalk that was given to you by God. Do that 15k more times and you can be IDF.

GW: Key evidence I had uncovered included Blackberrys used by the Senate to negotiate the Iran nuclear deal, which had also been used previously to orchestrate the Arab Spring a host of other covert weapons deals. This key evidence, instead of being presented in the best possible light to Congressional investigators and the DC Court, was pixelated and undermined in credibility to a filmmaker who I helped get started in social media. Because the filmmaker was pixelating the key smoking gun, the Senate BlackBerry, the whole class action was tainted, and in the daily, petty diatribes from the filmmaker demanding more money and attention didn't help either. The responsibility I felt to every American and especially veterans who had fought in the Soviet era as a bulwark against Communism was slipping through my fingers.

I just spent three day with a Marine Colonel who spent thirty years directly advising the Joint Chiefs of Staff on new methodologies of land, sea, and air warfare. His father was also a Marine Colonel who served in combat in three different wars. I didn't have the heart to tell him the DNC was brokering the hard won spoils of war from the five decade conflict with the Soviets to the oil, rich nations of the Middle East, including nuclear fissile material and bioagents.

Now the filmmaker has come clean, finally publishing the key witness in the Senate's picture after six years of withholding it from me Finally the BlackBerry is unpixelated as well after six years of undermining.

Small consolation for the dead at Arlington who fought and died so those nukes and bios wouldn't be sold to fund Washington corruption and a Deep State chokehold on power.

The battle would continue though a few months later with a female, ex-cop from California who was working with veterans who are on the brink of suicide, who had given her critical information to help my investigation.

It had been a whirlwind eight months in Washington including numerous trips to all the spy rings safe houses around the US and Canada. I visited illegal entry ports and safe houses in Canada to weapons caching locations in Indianapolis and everywhere in between

And along the way, we focused on the brokered Soviet military bioagents that could one day be turned on the American people

Our researchers have been proven right time and time again on the Senate and Biden Blackberrys, and we were right about the bioagents as well. We can't change the small minded pettiness of the egomaniacal and the shortsighted. We press on every day with new investigations, knowing the inevitable validation and substantiate our research.

But man did we miss a golden opportunity in the Fall of 2017, and every year since.

I asked Angie Bowie why her ex was involved in magick. She recalled that he heard that Led Zeppelin were involved in the occult, and so he wanted to be even cooler and scare Jimmy Page. By 1970 Page was obsessed with Aleister Crowley, had a growing collection of Crowleyana and that same year bought one of the most treasured Crowleyn artefacts of all: Boleskine House on the shore of Loch Ness in Scotland which was Crowley's estate from 1899 to 1913. -- Peter-Robert Koenig

Conclusion [to 38 pages]: In summary, the debate remains about the ethical status of MRT in fertility to treat and prevent diseases from transferring to offspring. The hope is that, in time, with more study and more progressive movement in legislature, that scientific innovations and halachic psak can catch up, and those carrying mtDNA mutations can have a fair chance of conceiving a healthy child

An integral theory of cultural evolution gathers evidence across the social, behavioral and biological sciences in search of Consilience, or the deep unity underlying the sciences. This study examines analytics from across levels of science to identify the common thread binding Emotion, Motivation and Perception. That thread weaves through the biological, psychological, interactional, social and cultural levels. This study offers that Affect Control Theory can be extended to include new analytics by offering a unifying Color Theory of Emotion, a complete Emotion Taxonomy, a unified Model of Moral Motivations, and a possible new direction in developmental stage theory. Together they offer a means for intentional cultural change.

Look at this clip. The gall and duplicity is just incredible. The ADL's and the Greenblatt's sanctioned all of this going
on at the University campuses when it was directed at White students. They cheered it on. Diversity! Replacement!
Affirmative Action! CRT! Anti-Colonial studies! Whiteness studies etc. it has never stopped. Most Whites have been
pushed out from most of the elite schools in fact.

NOW that Greenblatt, and the Jews he speaks for, are feeling just a pinch of what White people have been experiencing over the last few decades, not only at University campuses but in virtually every walk of life, he is totally bubbling over, losing his cool. Looking like a complete fool.

Here he is going off about "muh Jewish Children" while his organization have been creating profiles and lists of White people concerned with the future of White children, in order to ruin their lives for daring to stand up for all folk of European descent.

Let us be clear here: FUCK JONATHAN GREENBLATT AND FUCK THE ADL!

As War Rages, Israeli Settlers and Soldiers Try to Block the Palestinian Olive Harvest
Far-right politicians like Bezael Smotrich have joined forces with West Bank settlers in the campaign "as violence against Palestinian farmers ramps up on this front
A Palestinian farmer carries olives at an olive grove in the Palestinian village of Deir Istiya, last weekend. -----
Hagar Shezaf ----- Nov 20, 2023 ----- These days in November are normally the peak of the Palestinian olive harvest in the West Bank; entire families spend days bringing in the crop and holding picnics in this ritual of both work and pleasure. Then the farmers and family members send the olives to presses to produce olive oil.
But for years now, the harvest has been marred by violent assaults by settlers. And this year some farmers have simply given up amid recurring threats from settlers, a campaign by Bezael Smotrich's Religious Zionism party, restrictions on movement by settlers or the army, and a sharp rise in violence.

Keynote: Profiling Socially-Motivated Cyber Criminals - Jackie Singh ----- OWASP Foundation --- 61.9K subscribers
----- 1,311 views Nov 23, 2023 ----- Keynote: "The Threat Actors We Forgot to Model: Profiling Socially-Motivated
Cyber Criminals" from OWASP 2023 Global AppSec DC

Slides: https://static.sched.com/hosted_files...

This Halloween, delve into the eerie realm of Internet hate forums and discover the chilling, real-life tale of an unassuming man who is mercilessly pursued by a novel breed of cyber aggressor. The innovative research of our Keynote Speaker, grounded in firsthand interactions with these perpetrators, reveals the terrain of the Socially Motivated Threat Actor. These networked adversaries distinctively manipulate both digital infrastructures and human procedures, operating en masse and through specific engagements, to exert influence and inflict damage upon their selected targets. For security professionals, grasping this evolving dimension is essential for reducing uncertainty and crafting an efficient defensive approach in the face of a cyberattack.

Jackie Singh-- Hacking, but Legal -- Independent Consultant

Jackie Singh is an American security consultant whose technology interests began at an early age-she was once an active participant in an established New York City hacker/cyberpunk collective. Jackie began her professional career in the U.S. Army and first deployed to Iraq as a young idealist in 2003. She then spent the better part of that decade working in Iraq and Africa in cleared roles. Jackie previously founded a boutique cybersecurity consultancy, Spyglass Security, and has held several significant roles in defensive cybersecurity, including Principal Consultant at Mandiant and FireEye, Global Director of Incident Response at Intel Security and McAfee, and Senior Incident Response & Threat Analyst on the campaign to elect Joe Biden and Kamala Harris in 2020. Jackie joined the Surveillance Technology Oversight Project in 2021 due to her desire to help counter advancing threats to civil liberties posed by surveillance technologies. She lives between New York and San Juan with her partner, their daughters, and a goldendoodle named Ziggy.

one hell of a 'foeknee' way to admit you are a Warz4[B]IzRealHell wwwOrcer

The video indulges merciless victimhood memery for over half an hour straight, with zero 'trigger' factor enumeration or even mention .. quite the opposite in fact ... all just 'out of the blue' yonders behind the malicious mountains o something ... and that's just for starters ... cause it doesn't get any better either.

I listen to the MatiOnAir chats and regret the focus on excessive ego bloat [which you yourself admit to be doing as well by the way, oddly enuff], altho i understand the indulgence by those whose sense of humor carries the burrs that stick with and to these often artistry triggering syndroms and complexes.

Ridiculing is not a very effective cure but exceedingly useful as a social service, akin to reading manuels and the ways one shops windows and peruses catalogues, increases vocab, etc.

i myself get nothing like that [certainly no mirth] out of delusions and the compensation# copes fueled by them [wether mere cringe or damaging].

Every human is born to stick to and be stuck w bad habits to a very large extent .. all the more so to the degree we perpetuate and prolong them reflexively .. and reflexivity is a poor solvent with many perils of its own, a 'taste' that is truly fraught w rabbit wholes and loooooong in acquiring [99.999999999% don't hit no 'finishing' line whatsoever before they are 'finished with it'].

So no, I don't find anything on kiwifarms comical but that said, also very little i'd call criminal.

Manmade elec tickeree is toxic and therefore digital turdflinging is too in fact, binaries are a hugely unstable hurdle [to counting beyond themm] and gauntlet, a life threatening initiation, a true viability test .. and on top of that, psychologically, the double / fold / mirror brained bipeds fallen and strayed from treecultures, these challenges only get exacerbated due to troubles [of dubbullz] it takes to justify || rectify our senses of taste and appetites for distastes.

Many a course of event grinds much of what is, bad and good alike, into oblivion w distinctions out of emofeefee' reach enuff to seem like vagaries. Cynial opp'ists think it 'best' to take those as 'devil may care' excuses.

kiwifarms is a mockery site, first and foremost ... and i feel a huge distance to it cause i focus on and try to 'fix' mockery of good things

But we have alarmist kooks on one side like DrEliDavid and @visegrad24 both hardcore Zionist propaganda Vs revisionist kooks on the opposite side talking about muh Red Coss report. Neither studied the issue they just react to internet memes and 1 letter from Roswald McClelland about 1 area of 1 complex. ----- The Red Cross refused to allow their report to be used as German propaganda bc they knew what they were allowed to see was cherry picked. They also feared the Nazis would cut off access for delivering desperately needed aid if they outed them in public reports. They opted to save lives over issuing condemning reports in 44. ----- In their attempt to smear the Red cross bc they dont like the red cross reports on Gaza they are making more ppl doubt the holocaust. -- Sick ---- Auschwitz wasn't "a" camp. Auschwitz-Birkenau was the name of a complex of 40 different camps and ghettos. ----- You can see by the Theresienstadt camp inspection the Red Cross visited in 44' didn't have methods for mass extermination aside from overcrowding because that was a labor camp. Nazis didn't allow a full inspection of the complex. Showing one page of Roswald McClelland's forward to Earl Harrison is misleading and devoid of context. ---- They knew camps outside Germany did not allow freely done inspections, but did not want to lose access to what they were privy to bc they were delivering them needed goods and aid. Their reports were constructed not to publicize Nazi atrocities at that time out of fear of losing access to what parts they had.

Charlotte Bach's extension of the concept of shamanism can help us to recognize an essential affinity between the practices of the shaman and the scientist. For this, we need to make a clear separation between the scientific temper, and the particular story that scientists may be telling at some particular time.

A posthumous interview with Charlotte Bach, chaneled by Mike Roth in autumn 2008.

photo of mike Charlotte. I want you to imagine that the year is 2009, which is exactly 18 years since your "Selected Writings" were due to be published by Wildwood House. Imagine, if you will, that the publication fell through in 1982, the year after you died, and that your ideas and writings have been almost entirely neglected in the intervening time.

And according to your theory, this pervasive sense of dread, and mistake, is coming from something like an excess of identity: being both male and female within a life-cycle which implicitly demands that I be one or the other. It is as if I have been catapulted into adult life, for which I am under-equipped, and can only manage by pretending I can do it, which means by copying other people who are in reality just as hollow, lost and confused as I am myself - but seeming not to be.

photo of charlotte - Well, that is a fine description, and you have captured beautifully - quite poetically - the felt sense of what it is to be on the cusp of our androgynous, neotonous being. Yet you are also missing the point quite dramatically, in one very important sense. By keeping your description anchored to this point of not knowing - you veer away from the fact that for most of the time, we know perfectly well who we think we are, and we are able to flow spontaneously with the appropriate cultural rituals. You are forgetting how readily, and how confidently, we are able to mimic other people. So as you said, we happily inhabit the roles or personas - the personality, even, of the people around us. We are fully clothed in patterns of behaviour, freely imbibed from everything we observe in the children and the adults in the neighbourhood. So you have described something different from this: namely, the moment of confusion, and loss of identity, that leads us into another domain altogether. This crisis of identity, this dislocation and anguish, is what I have described as the prelude to the shaman's descent into the underworld.

photo of mike - So yes, this opens up another huge topic that you have covered extensively in your work: the role of the shaman or the witch-doctor...

photo of charlotte - It is more general than this: they are shamans or witch-doctors in traditional societies, but in modern times we have exactly the same thing: the culture-heroes in every shape and form, and also the originators of major religions including the ones which seem the most bizarre to the mainstream, for instance Christian Science, Latter Day Saints and so forth. But also Gore Vidal, who writes so brilliantly and satirically about these very characters - he too is one of them: a larger-than-life cultural revolutionary, we might say... So, also, Jesus, the Buddha, Abraham, Mohammed - but in the twentieth century Adolph Hitler, Winston Churchill, Mahatma Ghandi, and in a lesser way perhaps, the big stars of "stage and screen", the football heroes, the artists, the "pop stars" and so forth...

So, whether we are talking about the traditional, or the modern versions, we can say that the shaman, the witch-doctor, is the individual in which these crucial issues come to a head: - the painful loss of identity that you have mentioned: the sense of dislocation, the feeling of being a "self" that is entirely paradoxical. This is a person who, just like everybody else, needs the human community for their psychic and material survival, but who also feels the full force of the oppressiveness, we might even say the impossibility of the relationship with other humans. They are the ones who are forced into some kind of radical innovation - some extraordinary creative spark - within themselves, just in order to survive.

photo of mike - So this resolves what was earlier looking like a disagreement between us, about the typical way of being human. In some ways the shaman is exactly like everybody else, in this state of inner homelessness - and yet it comes to a kind of fever-pitch in this minority, which is precisely what goads them into becoming cultural innovators. Whereas the majority are able to get along, in relative psychic comfort, muddling along with the cultural roles that they absorb or "take on" from the people around them.

photo of charlotte - Exactly so. Except that it is also true that most human beings find themselves in such a state of internal crisis at some time or another in their lives.

ends thus [on the unwritten laws of the 'let's you and me dance' biology engages with culture]:

Yes, it is my central postulate: the one that drives the theory of emergent evolution - the neoteny and the androgyny in other words - that has profoundly objectivist and subjectivist implications, both at once. That is why we can talk about "mutation" and "the shamanic journey" in one and the same sentence.

Fiction as a Key Meta-system.

This account, of course, is highly stereotyped in comparison with what we actually meet with, in our experience of life. This is because the individual life variations drop out of the story(15), as we sketch out the typical pattern of interactions from a biological or ethological perspective. (The purpose of this account, as I said, is simply to begin to get a feel for the functioning of the meta-system.) We need quite a different approach, if we want to get closer to our personal experience, with its rich variety and our perpetual overflowing beyond the simple stereotypes. For this we shall begin by considering the perspective of dramatic art: the stories told to us in novels, films or theatre.

Let us note first of all, how we may find the meta-system coming into sudden, sharp focus, due the contrivance of the artist. This happens at certain points in the unfolding of certain novels, or films(16).

Virginia Prince: A conflicted life in trans activism

by Zagria Cowan ----- 2013, Gender Variance Who's Who

Virginia Prince was perhaps the best known spokesperson of transvestite activism in the twentieth century.

However, an investigation of her life reveals a mixture of achievements and failures stemming largely from an anxious wish for respectability and the desire to disassociate her own kind from what she regarded as similar but less respectable groups. This biography, built largely from the author's encyclopaedic history of gender variance at zagria.blogspot.com, bares Prince's strengths and inadequacies by positioning her against a backdrop of interesting, relevant social events and psychological developments which coincided with the different periods of her life and work, in a chronologically sequential narrative. Following the biographical narrative, a historical analysis of transgender jargon associated with Prince will resolve widespread controversy over the jargon.

Israeli officials are only intensifying their genocidal rhetoric. On Monday, Netanyahu hosted Elon Musk, the world's richest man and a notorious proponent of racism and antisemitism, to promote his onslaught against the Palestinians. Musk said during the visit:

There's no choice but to kill those who insist on murdering civilians. There's no choice. They're not going to change their mind.

Musk's visit was broadly condemned even within Israel. Esther Solomon, the editor-in-chief of Haaretz wrote:

Blatant antisemite & publisher of antisemitism Elon Musk should be persona non grata in Israel. Instead, Netanyahu, plumbing new depths of amoral sycophancy, gifts him a PR visit to the kibbutzim devastated by Hamas. Profane, venal, bilious, both of them.

Ahead of the visit, Musk publicly endorsed a Twitter post advocating the "great replacement theory," which declared: Jewish communities have been pushing the exact kind of dialectical hatred against whites that they claim to want people to stop using against them.

breitbart quotes Musk:

It was certainly an emotionally difficult day, to see the places where people were murdered. And also to watch the video where the murderers are rejoicing. Celebrating the murder of innocent people is extremely disturbing. So we have to do whatever is necessary to stop the hate. Essentially these people have been fed propaganda since they were children. And it's remarkable what humans are capable of if they're fed falsehoods, from when they are children, they will think that the murder of innocent people is a good thing. That is how much propaganda can affect people's minds. So you know, I actually did talk with the Prime Minister. And I think there's three things that need to happen in the Gaza situation, there's no choice but to kill those who insist on murdering civilians. You are [:::piet; !!!!! #typo, should be aren't, as in other reports, proly] going to change their mind. But the second thing is to change the education so the new generation of murderers is not trained to be murderers. And the third thing, which is also very important is to try to build prosperity.

Eaton is suspected of shooting Hisham Awartani, Kinnan Abdel Hamid, and Tahseen Ahmed. They were shot on Saturday afternoon after they had all visited Awartani's grandmother's house.

Our Terrence Malick series continues with The New World, Malick's depiction of the Pocahontas story. Thomas and Steven analyze the film's treatment of religion, romance, and civilization, while continuing to consider the extent to which Malick's mystical themes are Christian. They discuss philosophical questions raised by the film regarding religious pluralism and phenomenology.

ESG Concerns in Ukraine Reconstruction ===== Henry George School of Social Science ----- 12.2K subscribers
----- Dec 4, 2023 ----- Despite the ongoing Russia-Ukraine war and the extensive debates among media and policymakers, fixated on the supply of weapons, it's imperative to shift our focus toward crafting a precise reconstruction plan for Ukraine, based on green renewal and human capital engagement â€” core pillars from an Environmental, Social, and Governance (ESG) perspective. The second year of war has turned the spotlight on ESG considerations in a new way. All previously established ESG practices face new challenges, such as an unprecedented negative environmental impact, the depletion of human capital at both physical and physiological levels, and a survival struggle among business entities.

Key areas:

1. Presenting recent data on the damages inflicted on the ecosystem
2. Analyzing the war's impact on human capital and education
3. Exploring the main economic issues and recent political tensions
4. Discuss future priority goals aligned with global sustainability and Ukraine's resilience

Speaker:

Prof Nataliia Bychkova, PhD, Karl Loewenstein Fellow and Visiting Associate Professor in the Department of Political Science at Amherst College, Amherst, MA; Associate Professor of the Department of International Economic Relations, Odesa National I I Mechnikov University, Odesa, Ukraine; Visiting Professor of Bologna University, Bologna, Italy

The US-Israeli genocide in Gaza has intensified the divide between the West and the rest of the world. Manolo De Los Santos, Co-Executive Director of The People's Forum and a researcher at Tricontinental: Institute for Social Research, explains the geopolitical implications of the war, as a unipolar world dominated by U.S. hegemony shifts to a multipolar one.

RAY BLANCHARD

pleased to announce, for the benefit of everyone with a scholarly interest in autogynephilia, the debut of a new website by Anne A. Lawrence.

Anne A. Lawrence MD, PhD

On Gender Dysphoria and Transsexualism

2013 book, Men Trapped in Men's Bodies: Narratives of Autogynephilic Transsexualism. There are also links to videos and podcasts in which I've participated and there will be occasional essays on topics related to gender dysphoria. Some of the ideas presented on this website are controversial. I hope to present additional controversial ideas as time and energy permit.

I'm excited to be embarking on a new research project involving first-person narratives by the elders of the MtF transsexual community. Please read the prospectus below and consider participating.

Wistful Bird -- Did You Transition Ten or More Years Ago? A Research Project ----- First-person accounts by MtF transsexuals are essential for understanding the transsexual journey. My book Men Trapped in Men's Bodies presented narratives by 249 MtF transsexuals who had experienced autogynephilia. Now I'd like to follow up with a second similar research project.

Many postoperative MtF transsexuals have written autobiographies but no one has collected personal narratives by MtFs who transitioned ten or more years ago. They are the elders of our community and their perspective could provide important guidance to anyone considering MtF sex reassignment. If you transitioned ten or more years ago, please consider writing about your experiences. You can find more information and a response form below.

Lawrence, A. A. (2007). Becoming what we love: Autogynephilic transsexualism conceptualized as an expression of romantic love. Perspectives in Biology and Medicine, 50(4), 506â€"520. <https://doi.org/10.1353/pbm.2007.0050>
Abstract: The increasing prevalence of male-to-female (MtF) transsexualism in Western countries is largely due to the growing number of MtF transsexuals who have a history of sexual arousal with cross-dressing or cross-gender fantasy. Ray Blanchard proposed that these transsexuals have a paraphilia he called autogynephilia, which is the propensity to be sexually aroused by the thought or image of oneself as female. Autogynephilia defines a transsexual typology and provides a theory of transsexual motivation, in that Blanchard proposed that MtF transsexuals are either sexually attracted exclusively to men (homosexual) or are sexually attracted primarily to the thought or image of themselves as female (autogynephilic), and that autogynephilic transsexuals seek sex reassignment to actualize their autogynephilic desires. Despite growing professional acceptance, Blanchard's formulation is rejected by some MtF transsexuals as inconsistent with their experience. This rejection, I argue, results largely from the misconception that autogynephilia is a purely erotic phenomenon. Autogynephilia can more accurately be conceptualized as a type of sexual orientation and as a variety of romantic love, involving both erotic and affectional or attachment-based elements. This broader conception of autogynephilia addresses many of the objections to Blanchard's theory and is consistent with a variety of clinical observations concerning autogynephilic MtF transsexualism. ps to yesterday's post:
the last presenter mentions maia kobabe ... book "people get mad about on the internet" --note to self:
check later. This guy plunged into the lit for a year after 'burnin man' and 'circus stuff' ...
All 5 presenters are perfectly meticulous and articulate. They colour in all shades of intimacy and yet leave
me wondering why they choose to ignore that giant elephants and entities larger still, making the room a
much vaster read than this intelload of feepee selffixities can ever cozy up.

i mean, of course, societal aspects such as violence and interspecial effects from blanket coverage of
conditions like the spread and generalization of all the fall out modern industries could get away with,
that set present denouemental outage up generations ago.

Summarizing all that i'd say: - 'dysfoephlasticity' .. remains unmentioned.

What i mean with that neologism:
the utter devastation in, of and via our dear o so pragmatic western comfort society, installed by the
people who experienced all this waaaaaay back [babylon? china? the planet that is now a ring of
smithereens?]

Let's stick to the most traceable iteration shall we?

I submit our truubuls r proly a little faithful copy of and due to toxic material used to 'pervfact'
professional deformation of some bookish bloodline or other, defecting to try leave it all behind and start
an empire or at least a cult. But ... truubuls are hard to shake as we learn the hard way fast now
-shortly before- fastest at imminent demise ... at jew pop'ity plunge ... witness 8 genders named in the
talmud.

The installation drive is, of course, jealousy nursed to purity - euphemized and cloaked as generosity,

eagerness to share and the pandora's box of borderfuckery that ensues from all that.

Before the establishment of Israel, my grandmother lived in Baghdad, Iraq. There, she watched a man rape a mentally disabled teenager with a broken glass bottle. Because the girl was Jewish. This is what it was like for Jews in the Middle East before 1948.

JBGT3: The goal in taking out Northcliffe was to take over his publications-itâ€™s what his editor did, who then took over the publication. The bigger picture is in the takeover of England/Empire. Quigley revealed Lord Milner and the other powers ruling from the shadows, but I donâ€™t recall him describing the things Douglas Reed reveals. I also try to measure all of this juxtaposed to Suttonâ€™s revelations. All of it is subject to analysis and often it takes going back to the books to double check things and see where some of it intersects. It is practically a constant process

On this episode of The Cost of Everything, we take a closer look at the â€˜wokenessâ€™ moment that has taken over the world. From movies to classrooms, it has shaped and groomed citizens with an ideology not everyone is on board with. Host Christy Ai and co-host Ed Martin explain how the â€˜wokeâ€™ movement has impacted their careers. Later, filmmaker Sean Stone joins the show to dive deep into how wokeness has made Big Pharma big money with hormone disruptors and medication for teenagers, as well as groomed children to doubt their own sexuality.

@thealthype: In the whole Russia-Ukraine war, I generally side with Russia. But one thing people don't
consider is why the Ukrainians have, despite generations of anti-nazi propaganda, tend to have a far more
favorable view of the Nazis than Russia or the west?

I think the answer is that Ukraine was almost entirely occupied by the Nazis, whereas the area of the modern
state of Russia roughly corresponds to the main battle line of the Russo-German war. Obviously the Germans
made forays past that area - the attack toward Moscow, the attack toward Baku and Stalingrad - but in the
main, it was Ukraine and Belarus that were occupied the longest and most completely.

I would be interested in what Byelorussians think about the Nazis. For the Baltic peoples, there's a
complication in that while they did experience Nazi occupation, the narrative is that the Germans were anti-
slav, not anti-baltic, and so Baltic peoples may rationalize in their mind that the "bad stuff" was happening
somewhere else.

Whereas, according to the propaganda, Ukraine and Belarus were ground zero for Nazi atrocities, so they can't
as easily shrug off the discordance between their experience and the propaganda.

Belarus is more aligned with Russia than Ukraine (both today and at least since 1918, and certainly well before
that), but I suspect the views of Byelorussians aren't as anti-Nazi as say, Russians from along the Volga or

around the Urals.
As for this Bandera guy he just seems like some anti-Russian fanatic, and just happened to side with the Germans since they were at war with the USSR.

olive oil chugger -- @ChuggerOil: If you as a ukrainian associate Russia with occupation, communism, holodomor and so on, you might be instinctively inclined to sympathize with what you perceive to be the opposite of communism and in Ukraine's case there's a case to be made that that's nazism.
DemokratieFeind: @TwChudmaxxer Inferiority issues
Hutton Maui -- @EsmeBlu83: At the top it is men with tiny hats at war with the world.
Nulling -- @Nulling346657: In general Ukrainians considered the Third Reich liberators from the Soviet Union. Holodomor was only a symptom to the wider suffering they experienced.
Involuntary Celery -- @invcel: Croats are also pro-Nazi
robbush -- @robbush1988: Bandera was against the Germans too, which is why he spent 1941-45 in Sachsenhausen. Granted in a luxury villa, but still as a prisoner and his org was purged after they tried to declare independence from the German war effort and assassinated the moderate Ukrainians.
Karl Radl --- @KarlRadl: It is worth mentioning that circa 100k Belarussians fought as a pro-German anti-partisan force in WWII. It isn't well known (Soviet suppression like with the Russians who fought with the Germans) but it is never-the-less suggestive.
T -- @T234565432: Would you support Russia invading any other European nation other than Ukraine?
Vlad Tepes -- @Timothy84599541: The holdomor affected Ukraine more than any other part of the Soviet Union. The Ukrainians were the most nationalistic group in the USSR, and the Jews targeted them for elimination. That's why they sympathize with nazis.
borsuk supremacist
@satanhaterpl: Answear is simple, modern Ukraine is based on antipolish and antirussian sentiment because these were countries they were 'occupied' by. And only nation who fought with both was Germany (both in WWI and WWII). Germans in Brest even created Ukrainian country (puppet, but still)
Serpent of Gnoses -- @SGnoses: Belarus lost 60% of its population during the war so I highly doubt it.
Axel Heist --- @axel_heist: The Germans gave their forefathers weapons to fight the Bolsheviks, and many did. Ukrainians were wise to the commies, and were grateful for the opportunity to get rid of them. To disavow nazis in total would be to disavow their grandfathers and great-grandfathers in total.

Nothing new or interesting here. The Mckevitts™ are sexual deviants who constituted a dangerous liability for the party, Tony was perfectly correct to use any means necessary to get rid of them, that's™ what a good chief of staff should do. Striker was also a libertine who posed a threat of blackmail or sexual impropriety investigations for the party, good riddance. NationalDegenParty ----- 11 Dec

The weirdest part about this is that this isn't™ the worst sex scandal to plague NJP. Anyone remember how the death panel used to always talk about a guy called "Action Hero"™?

Turns out he was into interracial cuckholding and was sharing his wife with a negro, which ended up being outed after he beat her in a cuckrage. --- Proof: <https://i.imgur.com/jGcTpU8.jpg>

that brings up a lot of very funny but alas, silent .. gifs fast ...

NJP claims to be a family-friendly org but is a disgusting swingers club for degenerate Gen X fatsos. Imagine defending these people.

>Tony fired after article drops -- He starts shitposting from the NJP's official Telegram and opens up comments -- Deletes all of NJP's videos from their Odysee channel:

>Post from his personal Telegram "A lot of very minor people going mad with their very minor amount of power recently." https://t.me/Tony_Hovater/8467

>Leaked audio of Striker reveals his true thoughts on McNabb and Jesse, calls them both "parasites". Says he's willing to continue making Strike & Mike and return to the NJP, but only if Mike is in full control

a quick way to improve israelite behaviour might be to arrange display of sufficient proof the kommisar class that fueled and directed all major demographic upsets since the word was invented to relieve the sullied and tired term that went before it, ...

... and not just class of course but as is seemly to jews only, a mix of 1 part race, 1 part doctrine and 1 part place ... interchangeable with equivalents of each which they manage to beg, steal and/or borrow from those around them on a never ending impromptu basis

..... anyway, ... THOSE peeps, ... proof they are responsible for the izreal after nazis after holodomor .. and neocons after all that .. wokie globalism w pharmafiyidiotic twists now .. as reason to bar them from immigrating to the Pale ... in fact ... this might be like dousing water on both wars at once can someone tell Putin, Xi and their circle of friends about this please?

#kommisars = not just a class cause jews, as always a mix of 1 part race, 1p doctrine, 1p place ... Xable with

.. hence izreal after nazis after holodomor .. and neocons after all that .. wokie globalism w pharmafiyidiotic twists now .. all reasons to bar them from immigrating to the Pale .. but the best one is the intent: douse water on both present wars at once
can someone tell Putin, Xi and their circle of friends about this please?

... pretty amazing stuff on the last one ...

Did three different DARPA Spy Girls go after Bruce Ivins Anthrax notebooks? Remember our visit to Cornell - the recipient of NIH and DARPA Anthrax grants.

Bruce Ivins giving a soccer ball to DARPA's Amy Jenkins has been characterized as a sexual gift. How is that sexual? Ivins might have been wishing Jenkins well, now that she left Ft. Detrick for her Anthrax Fellowship.

As I stated in the Summer of 2021, the DARPA spy girls were luring Ivins to Ivy League campuses to extract his Anthrax expertise from Ivins' notebooks. The DARPA girls possibly have used a KKR encryption scheme frequently used by none other than Henry Kissinger for encrypting his Anthrax notebooks. I don't believe Ivins would be putting his Anthrax notes in a KKR sorority code. I rejected Ivins's use of a Kappa Kappa Gamma sorority code. The Greek letter Gamma looks like a lowercase r. How could all the DARPA spy girls ask Bruce Ivins to encrypt their communications in the Anthrax notebooks he gave them from different college campuses and not be part of the same exfiltration team?

I believe Bruce Ivins used a simple Caesar cipher wheel with the KKR DARPA girls. I don't even believe they rotated the key off a seven-letter frame shift.

Ivry Dov claims Israel is the only matriarchy left .. which echos Otto Weininger. JordanB genders 'at faultness' unambiguously but leaves out specs. i am sure Israel nets women as easily as men, just differently.

But is it a symbiosis? Are jews like bees and do either and/or both of them maximize diversity, minimizing even as they sustain and 'resiliate'? Do other races make efforts to attract their services? Try to exploit and extort them? Make them look bad like Stolypin granting them the Pale on a condition they could not possibly meet [become farmers, .. which they'd have to after killing all their charges off ... or get cheaper ones after proving they were very replaceable .. which they themselves are as a drawbacklash / dark side of their very 'own' success ... with graingain especially ... joseph / eurasian taverns .. holodomor ..]

The genocidal sociopaths called "Israel" won't stop til they're forced to stop. This is not a "war". "Israel" holds all the power and controls all of Gaza. They are colonizers who only care about exerting dominance and power over Palestinians, all to steal land w/o consequences ----- FYI... Capitalism is a class-based hierarchy that functions solely for the greed/profits of the capitalist/owner class (a very tiny minority), at the expense of the masses of working class people. Capitalists hold the power, & workers are exploited "all for capitalists' "profits" ----- Sweetheart that's not how this works. An individual buying things doesn't impact the *SYSTEM* of capitalism, under which we are all forced to live. I live under this exploitative, oppressive, violent system of capitalism. I didn't choose to, but I can't escape it, unfortunately.

Replying to @AdamGreenberg20 and @byPlestia: Yeah I know y'all don't consider "Zionist" an insult, which just demonstrates what sociopathic monsters you are ----- I'm fully aware of this. I strongly support Native Americans seizing power by any means necessary and U.S. dismantling colonial power structures. So bringing up that I live on stolen land is not the gotcha some Zionists seem to think it is. By any means necessary, Native Americans and all other indigenous people must get liberated. We must follow their lead. It's about who holds the power in society. It's always about dismantling colonial power structures. I explained more in these tweets: Native Americans aren't asking any individual living in the U.S. to leave. Again, it's about the colonial power structures. Decolonize means that indigenous people must hold the power to make decisions about their own land. This is quite simple, really.

Let's dismantle ALL colonial/settler-colonial power structures, INCLUDING THE U.S. We must work to DECOLONIZE every society and every oppressive system. We must decolonize ALL power structures everywhere. It's not a "gotcha" when you point out I live on stolen land in the U.S.

Good lord "So much racist, anti-Arab, anti-Muslim, genocidal, revisionist bullshit in one message, I wouldn't even know where to begin with this DM I received
Zionism = genocide denialism & genocide apologia
It makes Zionists SO mad when you refuse to dehumanize Palestinians, Arabs, or Muslims. It makes them EXTRA mad if a Jew refuses to do this. They are so goddamn ridiculous. Then they try to claim I must be "a self-hating Jew" because of course I would absolutely love to dehumanize all Palestinians, Arabs, & Muslims if I loved and was proud/unashamed of being a Jew. In their world being a Jew must also mean hating Palestinians, Arabs, & Muslims
I absolutely support taking up arms against colonizers, occupiers, oppressors, and certainly against a violent terrorist apartheid state.

Zionists are exposing their actual ideology. They're colonizers who only care about stealing as much land as possible for themselves. That's why they've always been committing ethnic cleansing and genocide, because it's for land theft. Zionists are sociopathic, genocidal maniacs.

@JFGariepy: Ashley is aging like milk, and as is often the case, the leftist priors eventually show up in these "conservative" women.

Here she justifies female "repulsion" at "incels" who deserve a "slap in the face" according to her. Nothing is more leftist than justifying the abuse and dehumanization of males. She complains that male body counts are not as much under scrutiny compared to female ones; but are males pursuing high body counts? Are males causing divorces that would result in increased body counts?

The stats are clear: they are filing for divorce at a much lesser rate than women. Thus, female accountability to their engagement is what needs fixing. Thus, the increased criticism of females in red pill discourse is justified. Why would we guilt men for pursuing their interests in a society that is otherwise being turned to degeneracy by women's own volition while men are merely trying to catch up and have been rendered unable to change this state of things (because, woman freedom)?

Look at this woman in her glamorous boomer disco suit and know this: these posers will all expose themselves in the long run. None of them are right-wingers, none of them are traditionalists. They ended up in the "conservative" movement because it was a fad they felt like joining.

Well, well, well... Our Chief Prognosticator, Jeep, has foretold the future. Accurately predicting Striker's exit on last episode, it has come to pass. The panel takes a victory lap. Was Striker not anti-White enough? Speculation is abound, but at least now he can finally make his relationship with Angela Nagle public. ----- For TASOWN, it is bittersweet. Kev w a UK female "against assimilation" ..[not sure what that's about]

<https://rumble.com/v45ost9-streaming-with-peopleforpeople-karleen-tammik-podcast.html> Kev is betterspoken than usual ... bit of practice under his belt since listened to last i guess ..

The symptomology he describes of his own precovid case has a homology so exactly overlapping my own that i am supried he hasn't looked into industrial ag-poisons.

I therefore request hereby he look into glyphosate toxicity. My case of suffering a curious case of that is described here:

2019 = p336 - p254 = thru to end 2021

2022 = p255 - p520 = halfway thru sequel dropping soon

... i comments also, under a chiropractor recommendation, this:

WesternSupremacy - 2 days ago: He's said many times that he threw out his back trying to remove a drier from a truck in his early 20s so if it's not because of that, it sure didn't help.

And yes, he has at least 3 protruding discs in his lumbar spine region (as clearly shown in his latest MRI) so no amount of "manipulation" will fix it I'm afraid.

Not that I'd allow a chiropractor neary back, I don't want to become paralyzed/handicapped by a woo practitioner.

Not saying they're all bullshit, but I'm aware of way too many people who were irreversibly harmed to even killed by chiropractor "adjustments" of one's neck, so fuck that.

didn't know that yet ... i have a pronounced knob on my spine at top of my hipbones level but the relief i get from artemisia [a motherload of info/vids out there] has to do with what glyphosate did to my kidneys i am sure. I hereby urge Kev to start a few swigs a day of that most bitter and excellent herb.

an hour by a fella who hangs in Amsterdam theaters w Palivocacy and ... 'dragtherapy' [not sure what that's all about yet]

palis are stand ins for the arabs that protected jews from romans in the 3rd crusade ... this created the seed of 'return to jerusalem' but for the wrong reasons they felt spoilt and liked it ... in fact misreading an opp given to learn that the quran runs gematrian circles around all the nature code in jewish scriptures .. the stuff quran built on and got inspired by .. an undead life extension as it turns out ... both much afflicted by choking and smothering cringe but no matter ... that's a different topic

thus arabs are hated for making the ME/3rd temple nuttereee so indigestible and unsuccessful and counterproductive that they are to blame for their return, not jews themselves .. or nazis .. an 'afzwaaiier' of sibling bastard jews on their way to becoming neocons with kommisar pedigree ... early waves having already made it to china along other vectors and tenttackles
